Software developer with experience in developing back-end, front-end infrastructure and database designs for web applications. Achievement-driven, problem-solving professional with positive attitude targeting assignments in software development with organization. Works well under pressure and consistently meets deadlines and targets while delivering high quality work.

EXPERIENCE

OCT, 2018 – PRESENT

SOFTWARE ENGINEER, TALENTICA SOFTWARES - PUNE

Responsibilities

- Developed full stack feature of single sign-on from scratch for existing recruitment product TalentPool using Java, SpringBoot, Struts2.x, SAML 2.0 and integrated it with various federation softwares for Identity providers such as Microsoft ADFS, Ping Federate, Okta, OAuth and SSOCircle.
- Worked on different backend modules in multiple projects along with TalentPool simultaneously to develop and improve the existing features using Spring Boot and Java.

Achievements

- Improved the logging feature into multiple application by implementing single sign-on to avoid multiple credentials and improved ease of use.

Tech Stack Used

- Java8, SOAP/REST WebServices, Spring MVC, Spring Boot, Spring Data JPA, MySQL, Struts 2.x, Hibernate.

JUNE, 2016 – SEPT, 2018

SOFTWARE ENGINEER, MAHINDRA COMVIVA TECHNOLOGIES - BANGALORE

Responsibilities

- Mapping telecom clients, requirements and providing them best solutions involving evaluation and definition of scope of project and finalization of project requirements.
- Built, tested and deployed scalable, highly available and modular telecom software products.
- Served as point-of-contact for LMS (Loyalty Management Solution of Mobilytix Suite) for telecom operator client HCPT-Indonesia, IRIS for Banglalink-Bangladesh and LMS for Viettel-Vietnam.

Achievements

- Worked on back-end code to optimize the performance by implementing plugin model and upgraded the product with separate processes and improved the TPS by 60%.
- Deployed the product to replace the 8 years long product to improve the performance at the client site in Jakarta, Indonesia.
- Deployed the IRIS solution on production environment in Bangladesh and Vietnam and made it successfully live on client site in strict timelines resolving issues on the go.
- Developed customer care GUI, different kind of reports and different interface types on the go to support the customer requirements along with the widget changes.

- Developed an innovative software package through Ansible that automated the deployment of engineering products on client servers and to simplify release management, resulting in 70-78% reduction in overall time of deployment.

Tech Stack Used

- Java, SOAP Webservice, Struts 2.x, Hibernate, JDBC, Spring MVC, Oracle 12c, PostgreSQL, Ansible

EDUCATION

APRIL, 2012 - MAY, 2016

B.TECH, MOTILAL NEHRU NATIONAL INSTITUTE OF TECHNOLOGY, ALLAHABAD

Electronics and Communications Engineering

GPA- 8.32/10

SKILLS

- Java8, C, Spring, Spring Boot, Spring MVC
- Spring Data, Hibernate, JDBC
- SOAP, REST Web Services
- MySQL, Oracle 12c, PostgreSQL, Redis
- Data Structures, Algorithms
- Servlets, Struts, JSP, HTML, CSS, JavaScript
- Maven, Ant, Gradle, Git, SVN
- Solr, Ansible
