TALENTPOOL

End User License Agreement

Last revised: April 19, 2016

This End-User License Agreement ("EULA" or "Agreement") is a legally binding agreement between the customer (hereinafter referred to as "You" or "End User") and Talentica (Talentica Software (India) Pvt Ltd. hereinafter referred to as "Talentica" or "Licensor") for the software product, Talentpool, which includes all the files, media, and written materials, (hereinafter referred to as "Talentpool").

By installing, copying or using Talentpool, you de-facto acknowledge that you have read this EULA, understand it, and agree to be bound by its terms and conditions. If you do not agree to the terms of this EULA, you may not access or use the software, promptly return the complete and undamaged software package along with the accompanying items (including written materials, binders, brochures, etc.) to the place from where the software was purchased for a full refund of price paid.

The Parties shall enter into a separate Service Level Agreement ("SLA"), and which shall deemed to form part of this EULA.

1. Grant of License

Talentica grants you the following rights provided you comply with the terms and conditions of this EULA:

a. Scope of License:

Subject to the timely payment of applicable fees specified under the Commercial Agreement, and subject to the terms and conditions of this Agreement, Talentica hereby grants to end user, a non-exclusive, non-transferable, license, without right to sub-license to, for the term specified under the Commercial Agreement to use Talentpool internally in connection with

end user's own domains in the scope and manner specified under the Commercial Agreement, and subject to the payment of the corresponding consideration specified under the Commercial Agreement.

b. Documentation:

The documentation provided with Talentpool (whether on media or online) is licensed for internal, non-commercial use only.

2. Other Rights and Limitations

a. Reservation of Rights and Ownership:

Talentpool is protected by copyright and other intellectual property laws and treaties. Talentica or its affiliates own the title, copyright and other intellectual property rights associated with Talentpool. Talentpool is licensed, not sold. Talentica reserves all rights not expressly granted to you in this EULA. The software contains copyrighted material, trade secrets and other proprietary material of Talentica. All worldwide rights, title and interest in the software shall at all times remain with the Talentica. Talentica's right under this Section shall also extend to any modifications, customizations, enhancements, alterations made to the software. You shall not remove any product identification, copyright notices or proprietary restrictions from the software.

b. Rental/Commercial Hosting:

You may not rent, lease, lend or provide hosting services with Talentpool.

c. Activation:

Talentpool contains technological measures to prevent its use post expiration of subscription. As a result, you may not be able to exercise your rights to Talentpool under this EULA after the subscription period unless you renew your subscription of Talentpool in a manner described in the accompanying documentation.

d. Additional restrictions:

i. Distribute any copy of a Software (or Documentation) to have access to or use (such as in a timesharing, service bureau, or application service provider model) any Software;

ii. Use a software or its output to develop or enhance any product that competes with a Talentpool;

iii. Modify or create a derivative work of any part of a software or documentation;

- iv. Disclose the results of any benchmarking of a software (whether or not the results were obtained with assistance from Talentica) to any third party;
- v. Use the software in any manner to assist or take part in the development, marketing, or sale of a product potentially competitive with the software; or
- vi. Use the software, or allow the transfer, transmission, export, or re-export of the software or portion thereof in violation of any export control laws or regulations administered by the Government of India.

e. Additional Software:

This EULA applies to all updates, supplements, add on components and upgrades of Talentpool that Talentica may provide you or make available to you after the date you obtain Talentpool Subscription.

3. PAYMENT

Payment Terms: You will pay all amounts due under this Agreement in Indian currency. Unless explicitly set forth in this Agreement, all fees and other amounts due under this agreement are non-cancelable and non-refundable. Unless otherwise agreed to by the parties, you shall pay all fees or amounts within 30 days of the date of the invoice. A late fee shall be charged on any overdue amounts and any other fees and expenses not paid as provided under this Agreement at the rate of one and one-half percent (1.5%) per month, or the highest rate allowable under applicable law, whichever is less, commencing with the date the payment was due.

Taxes: The fees and all other amounts due as set forth in this Agreement are net amounts to be received by Talentica, exclusive of all taxes, duties, and assessments, including without limitation all sales, withholding, VAT, excise, ad valorem, and use taxes (collectively, the “Taxes”), and are not subject to offset or reduction because of any Taxes incurred by End User or otherwise due as a result of this Agreement. You shall be responsible for and shall pay directly, any and all Taxes relating to the performance of this Agreement, provided that this paragraph shall not apply to taxes based solely on Talentica’s income.

4. Commencement & Termination

This EULA is effective from the first date you subscribe Talentpool until terminated (“Effective date”).

Either party may terminate this EULA at any time by giving written notice to the other party if (a) the other party breaches this agreement and (b) either the breach cannot be cured or, if

the breach can be cured, it is not cured by the breaching party within 30 days after receiving written notice of the breach from the non-breaching party.

Consequences of Termination: In the event this agreement being terminated:

a. In the event this agreement being terminated, the end user is solely responsible for the proper cancellation of the account. You may cancel the account at any time by contacting support@thetalentpool.co.in. There will be no refund if the Service is cancelled before the end of the current contract. There is no cancellation fee. Cancellation is immediate, and all of the end user's content will be immediately deleted from the Service upon cancellation. The end user's rights under this EULA stand automatically and immediately terminated without notice from Talentica if you fail to comply with any provision of this EULA.

5. Warranty

You acknowledge that Talentpool is provided "as is" without warranty of any kind, express or implied, and to the maximum extent permitted by applicable law, neither Talentica, its licensors or affiliates nor copyright holders make any representations or warranties, express or implied, including but not limited to warranties of merchantability or fitness for a particular purpose or that Talentpool will not infringe any third party patents, copyrights, trademarks or other rights. There is no warranty by Talentica or by any other party that the functions contained in the software will meet your requirements or that the operation of Talentpool will be error free or free from defects. You assume all responsibility and risk for the selection of Talentpool to achieve your intended results and for the, use and results obtained from it. No oral or written information or advice given by Talentica or any third party, including, without limitation, any Talentica distributors or resellers, shall create any warranty in addition to, or in any way increase the scope of, the limited warranty.

6. Limitation of Liability

IN NO EVENT SHALL TALENTICA, ITS EMPLOYEES OR LICENSORS OR AFFILIATES BE LIABLE FOR ANY LOST PROFITS, REVENUE, SALES, DATA OR COSTS OF PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, PROPERTY DAMAGE, PERSONAL INJURY, INTERRUPTION OF BUSINESS, LOSS OF BUSINESS INFORMATION OR FOR ANY SPECIAL, INDIRECT, INCIDENTAL, ECONOMIC, COVER, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED AND WHETHER ARISING UNDER CONTRACT, TORT, NEGLIGENCE, OR OTHER THEORY OF LIABILITY ARISING OUT OF THE USE OF OR INABILITY TO USE TALENTPOOL, EVEN IF TALENTICA OR ITS LICENSORS OR AFFILIATES ARE ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

THE MAXIMUM AGGREGATE LIABILITY OF TALENTICA, ITS EMPLOYEES, LICENSORS OR AFFILIATES FOR DAMAGES OR LOSS, HOWSOEVER ARISING OR CAUSED, WHETHER OR NOT ARISING FROM TALENTICA'S

NEGLIGENCE SHALL BE LIMITED TO THE AMOUNT PAID FOR TALENTPOOL AND THAT TOO ONLY IF THE CLAIM ARISES WITHIN 6 MONTHS OF THE FIRST INSTALLATION.

7. CONFIDENTIALITY

A. EACH PARTY AGREES THAT ALL CODE, INVENTIONS, KNOW-HOW, BUSINESS, TECHNICAL AND FINANCIAL INFORMATION IT OBTAINS ("RECEIVING PARTY") FROM THE DISCLOSING PARTY ("DISCLOSING PARTY") CONSTITUTE THE CONFIDENTIAL PROPERTY OF THE DISCLOSING PARTY ("CONFIDENTIAL INFORMATION"), PROVIDED THAT IT IS IDENTIFIED AS CONFIDENTIAL AT THE TIME OF DISCLOSURE OR SHOULD BE REASONABLY KNOWN BY THE RECEIVING PARTY TO BE CONFIDENTIAL INFORMATION DUE TO THE NATURE OF THE INFORMATION DISCLOSED AND THE CIRCUMSTANCES SURROUNDING THE DISCLOSURE. SOFTWARE, DOCUMENTATION, PERFORMANCE INFORMATION RELATING TO SOFTWARE, AND THE TERMS AND CONDITIONS OF THIS AGREEMENT SHALL BE DEEMED CONFIDENTIAL INFORMATION OF LICENSOR WITHOUT ANY MARKING OR FURTHER DESIGNATION. EXCEPT AS EXPRESSLY AUTHORIZED HEREIN, THE RECEIVING PARTY WILL HOLD IN CONFIDENCE AND NOT USE OR DISCLOSE ANY CONFIDENTIAL INFORMATION. THE RECEIVING PARTY'S NONDISCLOSURE OBLIGATION SHALL NOT APPLY TO INFORMATION WHICH THE RECEIVING PARTY CAN DOCUMENT: (I) WAS RIGHTFULLY IN ITS POSSESSION OR KNOWN TO IT PRIOR TO RECEIPT OF THE CONFIDENTIAL INFORMATION; (II) IS OR HAS BECOME PUBLIC KNOWLEDGE THROUGH NO FAULT OF THE RECEIVING PARTY; (III) IS RIGHTFULLY OBTAINED BY THE RECEIVING PARTY FROM A THIRD PARTY WITHOUT BREACH OF ANY CONFIDENTIALITY OBLIGATION; (IV) IS INDEPENDENTLY DEVELOPED BY EMPLOYEES OF THE RECEIVING PARTY WHO HAD NO ACCESS TO SUCH INFORMATION; OR (V) IS REQUIRED TO BE DISCLOSED PURSUANT TO A REGULATION, LAW OR COURT ORDER (BUT ONLY TO THE MINIMUM EXTENT REQUIRED TO COMPLY WITH SUCH REGULATION OR ORDER AND WITH ADVANCE NOTICE TO THE DISCLOSING PARTY). THE RECEIVING PARTY ACKNOWLEDGES THAT DISCLOSURE OF CONFIDENTIAL INFORMATION WOULD CAUSE SUBSTANTIAL HARM FOR WHICH DAMAGES ALONE WOULD NOT BE A SUFFICIENT REMEDY, AND THEREFORE THAT UPON ANY SUCH DISCLOSURE BY THE RECEIVING PARTY THE DISCLOSING PARTY SHALL BE

ENTITLED TO APPROPRIATE EQUITABLE RELIEF IN ADDITION TO WHATEVER OTHER REMEDIES IT MIGHT HAVE AT LAW.

B. NOTWITHSTANDING SECTION 7(A) ABOVE, EITHER PARTY MAY DISCLOSE THE TERMS OF THIS AGREEMENT PURSUANT TO AN ACQUISITION, MERGER, SALE OF SUBSTANTIALLY ALL OF SUCH PARTY'S ASSETS, FINANCING, OR AS REQUIRED BY SECURITIES LAWS OR REGULATIONS; PROVIDED THAT THE RECEIVING PARTY SHALL BE BOUND TO A CONFIDENTIALITY AGREEMENT TO THE EXTENT POSSIBLE.

8. Dispute Resolution and Jurisdiction

We shall comply by the dispute resolution and jurisdiction laws of Lumesse for all disputes arising from or relating to this EULA. Disputes shall be settled by a single arbitrator appointed jointly by both the parties. The arbitration procedure shall take place in English language.

9. Severability

If any provision of this EULA is found void and unenforceable, it will not affect the validity of the other provisions, which shall remain valid and enforceable according to their terms.

10. Miscellaneous:

Except in the event of a sale or transfer by Talentica of all or substantially all of its assets or voting securities, neither party will assign all or any portion of its rights or obligations under this Agreement to any third party without the prior written consent of the other party.

11. Entire Agreement

This EULA together with the SLA shall constitute the entire agreement between Talentica and you relating to Talentpool. It supersedes any prior representations, discussions, undertakings, end user agreements, communications or advertising relating to the Software.

If you have any questions concerning this EULA, please write to:

Using This Guide

Welcome to Talentpool!

Talentpool is an easy-to-use recruitment software. The software helps HR Managers, Recruiters, Hiring Managers, Interviewers, and CXOs work together to meet hiring targets, reduce time to hire and lower recruitment costs.

The Talentpool User's Guide introduces you to the software. Its objective is to make you comfortable with Talentpool to start experimenting with it on your own. It focuses on explaining general concepts and ways to do common tasks, rather than give an exhaustive description of each screen.

Organization of this User's Guide

This User's Guide is divided into six chapters:

- Chapter 2 describes the recruitment process in brief, the need for a recruitment application and benefits of Talentpool. We recommend everyone to read this chapter.
- Chapter 3 describes how information is organized within Talentpool. We recommend everyone to read this chapter.
- Chapter 4 consists of many small tutorials describing common tasks that you have to do within Talentpool. We recommend that you read through all the tutorials once, to familiarize yourself with the entire functionality. Later you can use this chapter as a reference whenever you need to do a specific task that you are not familiar with.
- Chapter 5 describes all the reports that can be generated with Talentpool.
- Chapter 6 lists common questions and situations that you may find yourself in and workarounds for the same.

Who Should Read This Guide?

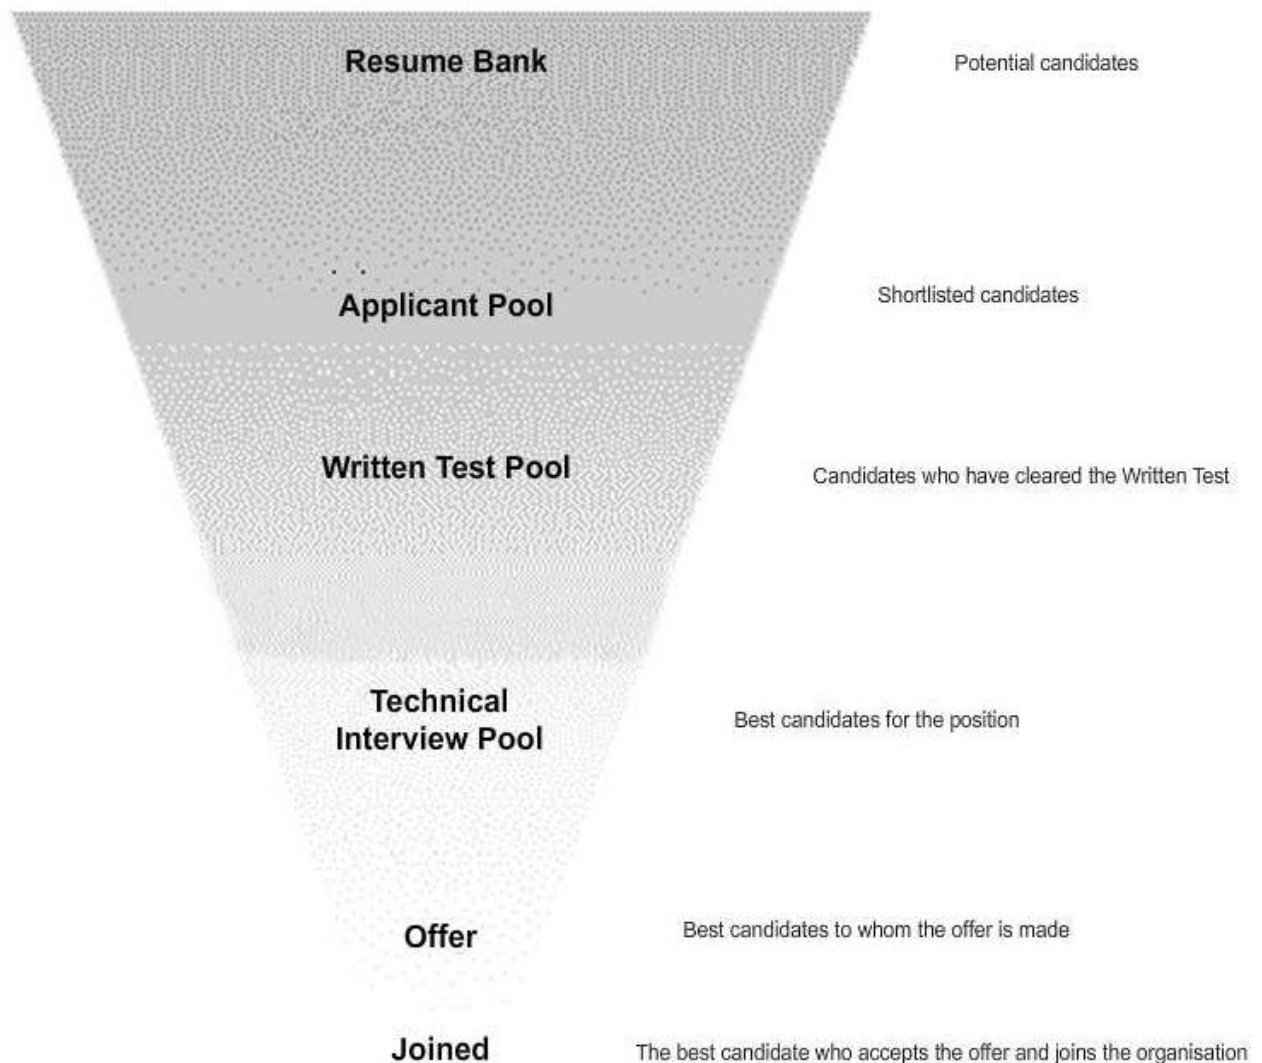

Anyone who is involved in the recruitment process in your organization should familiarize himself with the contents of this User's Guide.

About Talentpool

Talentpool is easy to use recruitment software. It helps HR Managers, Recruiters, Interviewers, and CXOs work together to meet hiring targets and reduce hiring costs.

Recruitment Process

The recruitment process can be compared to a funnel. At the top of the funnel, you have your resume bank – applicants who satisfy your hiring criteria in general, but are not under active consideration for any of the vacancies. At the bottom of the funnel, many selection steps later, you have candidates who have accepted your offers and joined your company. At every stage between the top and the bottom, candidates drop away either because they don't fit your requirements, or are not interested.

Need of Recruitment Application

In order to meet your hiring targets, you need to ensure that your recruitment funnel is “well stocked” with applicants at every stage. This will help you continuously focus your recruitment team on ensuring that there are no bottlenecks, and a steady stream of applicants is available for every position.

Recruitment Software helps you maintain a clear picture of your recruitment funnel at all points of time. Along the way, they also streamline your recruitment process, provide tools to increase recruiter efficiency and help analyze your performance.

Benefits of Talentpool

Talentpool is single, easy to use software. It ensures that all stakeholders in the recruitment process know what has happened, what is in progress, and what is expected out of them. It streamlines the entire process so that recruitment targets are met, average hiring costs are reduced, and hiring time is cut down. Thus, Talentpool benefits in the following manners:-

1. Work together to get things done

Talentpool makes it easy for HR Managers, Recruiters, Interviewers and CXOs to work together to reduce time-to-hire and cut down hiring costs. It has a browser-based, intuitive, uncluttered interface that helps you to get your hiring related tasks done efficiently, and in minimal time.

2. Don't pay for something you already have

Talentpool helps you leverage the large repository of resumes that you must have built over time, but are not able to use it because it is unstructured and is not searchable. With Talentpool's powerful search engine, you can search through resumes in text, html, Word and RTF formats for the right skills and experience.

3. Improve recruiter efficiency

Talentpool has a host of features that reduces time spent by recruiters on mundane tasks. Its resume parser automatically imports data such as name, address, contact information and skills from incoming resumes. It has a built in calendar that helps recruiters schedule interviews, intimate candidates and interviewers automatically. Easy-to-use mail templates help recruiters send introductory mails to candidates, while the duplicate detection system makes sure that the data remains clean. These and a host of other features help recruiters focus on what they need to do most that is reach out to more candidates and grab them before your competition does.

4. Maintain candidate relationships

How often do your recruiters end up calling candidates who have been approached by someone else on your team before? Talentpool maintains a history of all interactions with candidates including telephone calls, emails and interview history (if they have been considered by your company in the past). So before your recruiters call a candidate, they know exactly when he was contacted before, what position he was considered for and why the process was not completed.

5. Increase hiring productivity

Talentpool's to-do lists help all users stay on top of hiring related activities expected from them. Interview schedules, short-listing requests and other tasks are aggregated and displayed in a single, easy-to-use list that is displayed as soon as they sign in.

6. Get the bigger picture

Talentpool's extensive reports help you measure time to hire, time to fill, sourcing effectiveness, recruiter and team activity, and hundreds of other vital signs, all delivered directly to you in formats of your choice – .html, .csv, .xls, or .pdf.

7. Search easily for the right candidates

No matter how many resumes you have in your database, Talentpool's powerful search engine helps you find the most relevant candidates easily. Its ranked searching feature displays the most relevant candidates at the top of your search results. Search results are based on the candidate's actual experience and not on the number of years entered when the resume was imported into the system.

8. Continue to use your time tested selection processes

With Talentpool's customizable workflow, you can streamline the hiring process based on your time-tested candidate search techniques. What more, you can also adopt different processes for different job profiles. You don't have to follow the same process for all positions across the length and breadth of the organization.

9. Select the best

Talentpool's position wizard helps you define the traits an interviewer should assess for each selection step. This makes it easy to compare candidates and take good hiring decisions.

10. Keep software costs under control

Talentpool's single intranet license policy helps you control costs even as your organization grows. There are no subscription fees, nor any additional per user charges to be paid as the number of users increase.

11. Auto update of experience

While importing candidate, Talentpool takes working since date, which allows automatic updation of the candidate's experience. So if imported resume of the candidate remains unused for some time, the experience of the candidate gets updated automatically.

12. High-Level Security

Talentpool is WAPT compliant and adheres to all necessary measures required for high –level security of your data and the application.

Getting Started

Following chapters provide everything you need to know about getting started with Talentpool.

Talentpool User Interface

Talentpool's user interface is designed to give you a clear picture of your recruitment funnel at all points of time. It consists of nine tabs. You will be able to see some or all of them depending on your role in the recruitment process. You will see following window on successful log in.

The screenshot displays the Talentpool user interface. The top navigation bar includes the Talentpool logo, a search bar, and tabs for Dashboard, Import, Screen, Select, Hire, and Report. The sidebar on the left contains a search bar, a 'GO' button, and links for Advanced Search, Recent Searches, Last Viewed, and New Applicants. The main content area shows a Messages section with a list of messages, a To do list with tasks like 'Enter feedback for Technical Shortlist for 27 candidate(s)', and a Position Summary table with columns for Position, Recruiters, Vacancies, In Process, Pend. Offers, and Joined. A calendar section is also visible at the bottom.

Click here to view the next tabs.

A brief description of the contents of each of these tabs is as follows.

Tabs	Description
Dashboard	The Dashboard tab is the home page of the application. It shows you any messages that you have received, an aggregate list of tasks that you need to complete and the current status of all positions you are associated with and a calendar with your appointments. Now the recruiter's name is also visible on the Dashboard adjacent to the name of the candidate and the position.
Import	Import tab provides you a way to import resumes into your resume bank. It allows you to screen the incoming resumes, and import those that meet your minimum requirements.
Screen	Screen tab represents the top of your recruitment funnel. It provides you an easy way to search for candidates in your resume bank. Candidates may be searched by their experience, qualification, skills, location, and date of import or any keyword in their resumes.
Select	Select tab shows all the candidates in process. The list of candidates can be filtered by their name, position, selection stage, location, action or user. You can also check their current status using the drop down lists at the top of the display table. It also includes an activity log that lists all activities by all users for each of the candidates under consideration.
Hire	Hire tab represents the bottom of the recruitment funnel. It lists all candidates to whom offers have been made and are expected to join as well as those who have joined.
Report	Report tab provides a variety of reports that can help you monitor your recruitment process and progress. Reports include progress reports, activity reports and analysis reports. All reports can be viewed in .html, .xl, and .pdf formats.
Calendar	Calendar tab provides a bird's eye view of all interview appointments scheduled for you.
Positions	Positions tab helps you add and manage the current vacancies. It also lets you set up the recruitment process for each selection step.
Master Lists	Master Lists tab provides a way to add and manage records in your Master tables – an activity mostly done at the beginning of the Talentpool deployment.

Note: All screens now displays experience as 1 yr. 6 months instead of 1.5 yrs.
In addition to the tabs, you can see the following active links at the top of every page:

Active Links	Description
My Account	Click to change your profile or password.
Admin	Click to change the settings and rights of the application.
Help	Click to refer to the user manual of Talentpool.
Logout	Click to log out of Talentpool.
	Click to return to the default opening window.

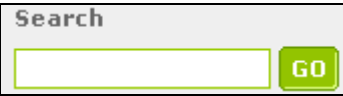

Position Summary on Dashboard

You can choose to have two custom columns that you want to view in the Position Summary section on the dashboard. To select the columns follow the steps given below:

1. Click **My Account**.
2. Click **Data View Configuration** on the left panel
3. Select a value for **Column-2**
4. Select a value for **Column-3**
5. Click **Save**

Note: Details on the Position Summary section on the Dashboard can be grouped by selecting a value (Department, Sub-department, Group, Requested by and Location) from the dropdown list.

You can view **Search** field on the left side of every screen (except reports screen). Following table describes the **Search** field options.

Fields/ Active Links	Description
	Type a keyword and click Go to display the information about search item.
Recent Searches	It shows the last seven searches made by you. They all are active links. You can click to go to the respective search.
Last Viewed	It shows the last seven candidates viewed by you. They all are active links. You can click to go to the respective candidate.
Advanced Search	It helps you to customize the search using various filters.
New Applicants	It shows all the applicants imported in the last seven days.

4	Can see all candidates in process for positions having rights.
5	Can set appointment for positions having rights.

Note: User with any role have rights to update selections process of the position in following cases.

- If he has either created the position
 - If he is Requisitioner for the position
 - If he is involved in any of the steps in the selection process of the position.
-

How Do I?

Add a New Position

✓	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	--	-------------	---	-----

To place requisition for a new position, do the following.

1. Click **Position** tab.
2. Click **Add New** to open Add New Position window.
3. In **Description** tab, enter details in the text boxes. You can also select a **Position Owner**, add the details of business units and sub business units.
4. Define the type of position as **Internal or External**.
5. In the field **Job Responsibilities**, you can copy the pre-defined responsibilities from **Copy from** dropdown list or you can add new responsibilities.
You can also copy the job description from your word file to Talentpool.
6. Auto generate a position code.
7. Select '**Type of Vacancy**'

Note:

- A position can be identified as a duplicate, based on configurable system fields like position name, and custom fields like skills, owner and many more.
 - To keep a duplicate check on field while creating a position, go to **Admin-> Duplicate Position Detection Settings->Check Fields->Click Submit**
-

Note:

- A Position owner has all rights related to the position. By default, position owners are members of the recruitment team i.e Recruiter, HR Manager and the Administrator.
 - To include Position type as a system field while creating a position, go to **Admin->Position Screen Config->Check Position Type**.
-

To copy job responsibilities of the predefined position, follow the steps given below.

- i. Select the position from **Copy From** dropdown list and click **Go**.
- ii. The window displays job responsibilities of selected position. To delete job responsibility, click **Delete**.

To add new responsibilities, follow the steps given below.

- i. Type the sentence in the area shown beside Add button.
- ii. Click **Add** to view the added responsibility.

8. Click **Next** to view contents of the **Requirements** tab.
(While creating position you can select skills from existing skills with the help of the **Requirements** tab.)
9. In **Requirements** tab, enter education, experience, and skills details.
10. You can select job requirements of predefined position or you can add new requirements.
11. Click **Back** to get back to the **Description** tab if you feel there are any changes to be made or click **Next** to view contents of **Approval** tab.

12. You can **Move to Next Approver** as defined or **Keep on Hold**. You can also put in your comments. Click **Finish** after you are done.
13. The person who is the next approver would receive an email notification and the task would also be visible on that person **To Do List**.

Note:

- While creating a position, multiple positions can be selected and added.
 - While creating a position you can opt to copy details like job description, requirement and step either from a position or a position template.
 - If you select 'Type of Vacancy' as Replacement, then you need to enter the employee code of the employee being replaced. To adjust the replacements against budget go to **Admin-> Application Settings->Budget Module Settings->Select Adjust Replacement against Budget**
-

Note: All the details of a particular position can be viewed in a new page. You can view this position detail page by clicking on the position in the Hire and Positions tab and Position Summary or Last viewed Positions. It can also be viewed by clicking **Applicants** on the Position detail page.

Tip: You can notify users about the requisition as you activate it or send it to the next approver. You can only notify if you have been given the rights by the administrator.

Note: You can define a default hire by duration through **Admin -> Application Settings** so that when you create a position, the date shows up automatically. Once the hire by date has passed, the position is highlighted in a different color on the Dashboard and positions screen.

The position requisitioner will be notified in case the approver does not approve the position within the stipulated time. You can set the time through **Admin -> Application Settings -> Requisition Escalation Timeout in Days**

Position Templates

Position templates can be created and used to create positions. To create a new position template, follow the steps given below:

1. Go to **Positions Tab**
2. Click **Templates**
3. Click **Add New**
4. Select the fields in the **Description tab** and Click **Next**
5. Select the fields in the **Requirements Tab** and Click **Next**
6. Select the fields in the **Approval Tab** and Click **Next**
7. Select the fields in the **Hiring Process Tab** and Click **Next**
8. Select **Copy Selection Process From**
9. Click **Go**
10. Click **Add New Step**
11. Fill in the required details and Click **Save**
12. Click **Finish**

To define permissions to add/edit position templates, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Users**
3. Click on the **Advance Permissions** icon
4. On the Manage User screen, scroll down to **Positions**
5. Select **Add/Edit Position Template**

To create a position using the position templates, follow the steps given below:

1. Go to **Positions Tab**
2. Click **Templates**
3. Select a **Template**
4. Click **Create Positions**
5. Select the fields in the **Description tab** and Click **Next**
6. Select the fields in the **Requirements Tab** and Click **Next**
7. Select the fields in the **Approval Tab**
8. Click **Finish**

Note: In case you wish to finish position creation later, you can save it as a draft by clicking on the Save as Draft button.

Approve the Requisition

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	----------------------	---	------------------	---	-------------------	--	--------------------	---	------------

To approve, the person responsible has to follow the steps given below:

1. Click the task in the **To-do List**.
2. Fill in the **Requisition Approval feedback**, which would again have options like Activate, Keep on Hold or Reject.
3. To approve the requisition the Activate option has to be chosen.

Note: If a requisition is pending in an approver's queue for more than a specific time, the same can be auto-approved by the system and will be moved to the next approver in process.

- Reminder emails will be sent to the approver till the time duration of auto approval is not crossed. Once the duration has passed, the requisition will be auto approved.
 - Auto approval can be enabled or disabled from the admin settings
 - You can set the time-duration through **Admin -> Application Settings -> Default days for Position Approval**
-

Activate the Position

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	----------------------	---	------------------	---	-------------------	--	--------------------	---	------------

To open or activate the position, the steps given below are to be followed:

- i. Click **Positions**.
- ii. Click **Select Positions to view**.
- iii. Check **Show in process requisitions**.
- iv. Select the position that you want to activate.

Follow the steps given below to define the hiring process without which the position cannot be activated:

Click **View Process**.

- i. You can see the **Step 1: shortlist** which is default step.
- ii. Click **Edit**

You can copy selection steps of predefined positions or add new selection steps. To copy selection steps of predefined position, follow the steps given below:

- i. Select position from **Copy selection process from** dropdown list and click **Go**.
- ii. Use Up / Down arrows to change sequence of the selection steps. Click Delete to delete the selection steps.

To add new selection steps, follow the steps given below:

- i. Click **Add New Step**.
- ii. Enter the step name, select relevant check boxes, enter Feedback Fields and Follow-up Messages and click **Add**.
- iii. Click **Save**. You can view the newly added step under Hiring Process tab.

You can also define if the step that you added should be a **Selection** step, a **Shortlist** step or a **Hire** step by checking on the corresponding radio buttons.

Set up the Position Screen Configuration

To determine what you would want to see on the various screens under the Positions tab, follow the steps given below:

1. Go to **Admin**
2. Click **Position Screen Config**
3. Choose fields that you would want to see in the Description of the position, Requirements of the positions and when you print the position. You can choose to show a different set of information on these screens.
4. Click **Save**

Select users in step Creation

While creating a step, you can choose to display certain information of the user. To define this information follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Enter the code for the values of the user information

4. Click **Submit**

Note: Following are the information that you can display about a certain user:

User first name, user last name, department, sub department, group, location, role and employee Id.

Clone a Position

A position can be replicated to create a new position.

1. Go to **Positions** tab
2. Enter all the mandatory fields marked with *
3. Click **Next**
4. Enter all the mandatory fields marked with * in the Requirements tab
5. Click **Next**

Note:

- **Users** and **Roles** can be selected using convenient grid controls.
 - While adding a new user, details such as the department, location, sub-department, group and assign under can be specified.
 - If a step is scheduled, then the Users who can schedule the step only show names of HR users.
-

Note: You can search for positions using various filters like position, department, sub-department, group, location, recruiter, primary skills, position owner and custom fields.

Edit Stage Name

To edit stage name, follow the steps given below:

1. Go to **Mater Lists** tab
2. Select **Stage Master**
3. Click on the **Stage** to be Edited
4. Enter **Stage Name**
5. Click **Submit**

Note: Editing stage name would mean renaming the stage.

Add New Position Step under Stage

You can add a new step to the stages using the Position Step Master. To add a new position step under a particular stage, follow the steps given below:

1. Go to **Mater Lists** tab

2. Select **Position Step Master**
3. Click **Add New Step**
4. Select **Stage**
5. Enter **Step Name**
6. Select **Insert After**
7. Select/ Deselect **Schedulable**
8. Add a **Description** for the step
9. Click **Submit**

Edit Position Steps

To edit position steps that fall under a stage, follow the steps given below:

1. Go to **Mater Lists** tab
2. Select **Position Step Master**
3. Click on the **Step** to be edited
4. Make the required changes
5. Click **Submit**

Disable Position Step

A position can be disabled for future use. To disable a position step that fall under a stage, follow the steps given below:

1. Go to **Mater Lists** tab
2. Select **Position Step Master**
3. Click on the **Step** to be disabled
4. Check the box next to **Disable?**
5. Click **Submit**

Note: You can delete a particular position step only if there are no in-process candidates in that step.

Map Current Position Steps to New Step Masters

Current position steps can be mapped to the new step masters only by the Admin. To migrate steps to the new step master follow the steps given below:

1. Go to **Mater Lists** tab
2. Select **Process Steps Migration**
3. Click on **Migration Wizard** under Migration Status
4. Click **Proceed** under the Disclaimer
5. In the **Step Master Mapping** window, map the current steps to the new steps
6. Click **Next**

7. In the **Positions with Exceptions*** window, map the current steps to the new steps
8. Click **Confirm Migration**

Note*: Positions with exceptions are those in which the steps are in a random order or may have additional steps in the stage

Publish Positions from Talentpool to Corporate Website

To publish positions from Talentpool to your careers website, follow the steps given below:

1. Go to **Positions**
2. Select from the **Publish options** on the left panel
3. Select **Publish to Corporate Website**
The screen shows the publication status of all positions. Unpublished are the ones which are not yet published on the corporate website.
4. Click **Unpublished**
5. Select **Publish** to publish the position(s)
6. Choose if the resume(s) sent for this particular position is/are to be
 - a. Sent to the Database
 - b. Sent to the Inbox
 - c. ShortlistedTo shortlist, create rules for Experience, Education, Branch, Institute and Current Location
7. Click **Submit**

Note: You can now have a filter screen on your corporate career website which will help candidates find the exact job openings based on location, primary skills and departments.

Publish Positions from Talentpool to Vendor Portal

To publish positions from Talentpool to your careers website, follow the steps given below:

1. Go to **Positions**
2. Select from the **Publish options** on the left panel

4. Select **Publish From Dates**
5. Select Criteria for the Position i.e **Employee can only Apply/ Employee can only Refer/ Employee can Apply and Refer**. You can also enable the option for the employee to email to a friend by clicking on **Employee can Email to Friend**
6. Click **Submit**

Set up Notification Mail when a New Position is Opened

To send notifications mails to employees when a new position is opened, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select checkbox for Send position published notification to employees
4. Enter **Group Email Id** (Example: company-all@domain.com. This is mandatory so that all employees get the mail.)
5. Click **Submit**

Send Notification when a Position is opened for Employee Referral

To send notifications to employees when a position is opened for employee referral, follow the steps given below:

1. Go to **Positions Tab**
2. Click **Employee Portal**
3. Select a **Position**
4. Click **Send Email**
5. Select the template that you have created for this notification
6. Enter Subject and Message
7. Click **Send**

Create Requisition Approval Template

To create a requisition approval process template, follow the steps given below:

1. Go to **Master Lists**
2. Click **Add New**
3. Fill in the name of the template
4. Click **Add New Step**
5. Fill in the name of the step
6. Select the user responsible for the step
7. Click **Save**
8. Follow the same process in case you want to have more than one step

Note: This feature is only available with the Enterprise and Pro versions.

Change Priority of a position

When a position is set the priority of a position is set to medium by default. By default only the HR Managers, the CXOs and the administrators can change the priority of a position but only after it has been created.

To change the priority of a position, follow the steps given below:

- i. Go to Position summary on **Dashboard**.
 - ii. Click on the green, red or blue square adjacent to the name of the position.
A window would pop up and the priority can be changed.
 - iii. Set the priority.
 - iv. Click **Save** to save the change.
- OR
- i. Click on **Positions**
 - ii. Click on the priority tags and change the priority.

Note: By default the changing rights are given only to the HR Managers, the CXOs and the Administrators. However these rights can be given to others as well.

Note: A notification is sent to the position requisitioner, recruiters and HR manager when any changes are made to the position.

Note: The colors that indicate the priority are as follows:

Red-High

Green-Medium

Blue-Low

Check Candidates under a Specific Position

To check the candidates who are in process for a specific position, follow the steps given below:

1. Go to **Dashboard**
2. Click on a **Position**
3. You will be able to view **Candidate in Process**, **Candidates Applied** and **Rejected Candidates**

Change the Feedback Criteria for a Selection Step

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	----------------------	---	------------------	---	-------------------	--	--------------------	---	------------

Feedback criteria are the factors on which a user (normally an interviewer) rates candidates. To change the feedback criteria for a position follow the steps given below:

6. Click **Positions** tab.
7. Select the position for which you want to change the feedback criteria and click **View Process**.
8. Click **Edit**.
9. Click the step of which you want to change feedback criteria.
10. In the **Feedback form** you can select a feedback form from the dropdown list.

The screenshot shows a software window titled "Account Sales Managers / Sales Engineers". Inside, the "Step Name" is set to "Technical Shortlist". Under "Assigned To", there are two tables. The left table lists users: Admin Talentica (Administrator), Hr Manager (HR Manager), Interviewer 1 (Interviewer), and Interviewer 2 (Interviewer). The right table lists Project Manager (Requisitioner). Arrows indicate a flow from the left table to the right. Below these tables, there are checkboxes for "Scheduled ?", "Decision maker same as assigned to ?", and "Interviewer can confirm ?". The "Selection Stage" is set to "Shortlist" (radio button selected). The "Feedback form" is set to "AUTO_Java Developer_Technical Shortlist_18". Under "Follow-up Messages", there is a checkbox for "Forward to Project Manager" and an "Add" button. At the bottom, there are "Save" and "Cancel" buttons.

11. Click **Save**.

The selection step is customized.

In case you want to change the steps altogether refer to *Create a Feedback Template*

Note:

- You cannot rename a feedback criterion. To change the name of a criterion, you have to delete it and create a new one with the correct name.
 - You cannot change/delete a criterion against which feedback has been entered by a user in the system.
 - Administrators, CXOs and HR Managers can change feedback criteria for all positions. Recruiters and Requisitioner can change criteria only for positions that they are responsible for. Interviewers cannot change feedback criteria.
-

Forward Candidate Resume

To mail candidate resume to an interviewer, follow the steps given below:

1. Go to **Select, Hire** or **Search**
2. Select candidate(s) whose resume you want to forward
3. Click **More**
4. Select **Forward Resume**
5. Click **Attach Resume** to attach the resume of the candidate
In case you have not attached the resume of the candidate, the receiver will be able to click on the name of the candidate and view his/her profile.
6. Enter the email address where you want to forward the resume
7. Click **Send**

Enter Feedback for a Candidate I have Interviewed

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

If you have received a reminder email to enter feedback, follow the steps given below:

1. In the feedback reminder mail, click on the **click here** link.
2. Enter your username and password if prompted for them.
3. Enter feedback for the candidate in the feedback window.
4. If you are the decision maker for the interview, select next steps that is move to the next step, reject or move to another position. If you want to keep the candidate on hold, don't select any of the options.
5. Click **Save**.

If you want to enter feedback through the Talentpool application:

- i. In **Dashboard** tab, locate the task in the **To do list**.
- ii. Click on the contents of the **To do** column.
- iii. Follow steps 3 to 5 listed above.

OR

- i. Select the candidate in the candidate list in the Select tab.
- i. Click Enter Feedback.
- ii. Follow steps 3 to 5 listed above.

OR

- i. Enter all or part of the candidate name in the search box on left side of any tab and click Go.
- ii. Click Enter Feedback on top-left side of the candidate details window.
- iii. Follow steps 3 to 5 listed above.

Note: Interviewer can also confirm attendance of a candidate now provided he has been given the rights.

Note: If you are the decision maker for the interview, select one of the options from **Move to the next step**, **Reject** or **Move to another position**. If you want to keep the candidate on hold, select **Keep on Hold**.

Tip:

To see the current status of the candidate you have interviewed, search the candidate in the database and view the **Action required** status.

Multiple Choice Feedbacks

You can have multiple choices for comments to be entered in a candidate's feedback form. To create multiple choice comments, follow the steps given below:

1. Go to **Master Lists** tab
2. Click **Multiple Choice Master**
3. Click **Add New**
4. Enter **Multiple Choice Name**
5. Click **Add new multiple choice option**
6. Click **Save**

Enter Bulk Feedback

To enter feedback in bulk, follow the steps given below:

1. Go to **Select/ Hire**
2. Select the candidates you want to enter feedback
3. Click **Enter Feedback**
4. Select the feedback
5. Click **Submit**

Note: The system will allow bulk feedback only when the same has been selected in Application Settings. To check go to Admin → Application Settings → Allow bulk feedback → Submit

Enter Bulk Note

To enter notes for more than one candidate, follow the steps given below:

1. Go to **Select/Hire**
2. Select the candidates you want to enter note for
3. Click **Add Note**
4. Enter your note
5. Click **Save** to save the note for the candidates

Configure Employee Code as Mandatory or Optional while Upgrading Candidate to Joined

To configure employee code as mandatory or optional, follow the steps given below:

1. Go to **Application Settings**
2. Scroll down to **Is Employee Code Mandatory?**
3. Select to make employee code mandatory or deselect to make it optional
4. Click **Save**

Note: By default, employee code is set as mandatory while upgrading candidate to joined.

Print Feedback Form of Candidate

To print feedback form of candidate, follow the steps given below:

1. Go to **Hire** tab
2. Select a candidate profile
3. Go to **More**
4. Click **Print Feedback**
5. Select a Printer
6. Click **Print**

Print out of the Requisition Form

To print the requisition form, follow the steps given below:

1. Go to **Positions** tab
2. Select a **Position**
3. Go to **More**
4. Click **Print Position**
5. Select a Printer
6. Click **Print**

Send Rejection Mail to Candidate

To send rejection mail to candidate, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Check the box adjacent to the field **-Send rejection email to Candidate**

Note: The mail will be sent to the candidate directly only if the Draft option is unchecked in Master Lists➔Template Master➔Candidate Rejection Template. A to-do will be generated for the user having access right to the Talentpool inbox so that he/she can clear the drafts.

To send the reason of rejection to the candidate, follow the steps given below:

1. Go to **Master Lists**
2. Click **Template Master**
3. Open the template for Rejection mail
4. Include the **\$CANDIDATE_INTERVIEW_FEEDBACK** in the template.
This will include the last feedback for the candidate in the mail.

Depending on the template settings, the mail will either be saved into “Drafts” in the Talentpool inbox or directly be sent to candidate. To-do will be generated for HR manager/Recruiter to clear the drafts related to candidates who are rejected from positions for which the recruiter has permissions.

If user has access to inbox then he/she can see only those drafts which are related to positions on which she has permissions. A user can edit drafts before sending them out.

Send Notification Mail to Candidate

To send notification mail to candidate regarding movement to the next step, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Check **Notify candidate when moved to next step**
4. Click **Submit**

Send Reminder to Vendor for Appointment

A reminder can be sent to the vendor when his candidate is scheduled for a round of interview. Follow the steps given below to activate this feature:

1. Go to **Admin**

2. Click **Application Settings**
3. Select **Send appointment reminders to Vendor**
4. Click **Submit**

Send Feedback Reminders for Non-schedulable steps

To enter feedback for non-schedulable steps follow the steps given below:

1. Go to **Admin**
2. Click Manage **Role Access**
3. Click on the user whom you want to receive the notification for non-schedulable steps.
4. Check the box for **Send Notification to User for Non Schedulable step**
5. Click **Save**
6. Click **Ok** to reconfirm

Once you save, the specified user would receive feedback reminder mails for non-schedulable steps as well.

Note: By default none of the users receive notification for non-schedulable steps.

Send Notification to the HR Team when employee who referred the shortlisted candidate is a part of the selection panel

In case the employee who referred the shortlisted candidate is a part of the selection panel appointed for the position, you can send an email to inform them of the same. To activate this feature, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select checkbox for **Send referent employee in selection process notification**
4. Click **Submit**

Create a Feedback Template

To change the feedback template follow the steps given below:

1. Click **Master Lists**
2. Click **Feedback fields Master**
3. Click **Add New**
4. Add the **Category Name**
5. Select **Is Summary**

Note: You need to deselect Is Summary if the fields need to be detailed.

Once you submit the name of the category click the corresponding field.

6. Click **Add New**
7. Select **Field Type**
8. Add the **Field title and description** (optional) and click **Submit**
9. Repeat the process and add as many fields as you want to.
10. Click **Feedback Forms**
11. Click **Add New**
12. Put in the New Form name and click Next

(By default the software would always create a **New Feedback form from scratch**.)

13. To add the feedback field that you created in the first few steps, click **Add New Feedback field**

14. Select Category, select field and check the box adjacent to it, **Text Box for Comments?**

15. Click **OK**

16. Click **Submit** after creating the required fields in the Feedback form.

Note: You can create a **Generalized** as well as a **Compact feedback form** based on the number of fields that you have in the field. A compact Feedback Form gives you more space to accommodate your feedback fields. You can update candidate related fields in feedback form, by selecting field type **Applicant**.

Add Applicant Fields to feedback Form

Once you submit the name of the category click the corresponding field to add applicant fields. Then, follow the steps given below:

1. Click **Add New**
2. Select **Field Type- Applicant**
3. Select **Applicant Field**
4. Enter **Field Title** and **Description**
5. Click **Submit**

Create Compulsory feedback fields in a Feedback Form

To make the feedback field compulsory, follow the steps given below:

1. Click **Master Lists**
2. Click **Feedback Forms**
3. Click **Add New**
4. Put in the name of the feedback form
5. Click **Next**
6. Click **Add New Feedback field**
7. Fill **Category**, **field**, **description** and **rating** as per your requirement
8. Opt for **comment box** as per requirement
9. Check the box adjacent to the **Required?** if you want to make that field compulsory

Print the Feedback Form

To take a print out of a blank feedback form, follow the steps given below:

1. Click **Master Lists**
2. Click **Feedback Forms**
3. Click the feedback form that you want to print
4. Click **Preview**
5. Select the format- **html**, **pdf** or **excel**
6. Click **Print Preview**
7. Click **Print**

Print Consolidated Feedback Form

To take a print of a consolidated (feedback of all users consolidated in one form) feedback form, follow the steps given below:

1. Select the candidate whose feedback you want to print
2. Select one of the feedbacks from the Interaction history
3. Click **Print**
4. Select **Consolidated**
5. Select the users whose feedback you want to see in the consolidated feedback form
6. Select the **format**
7. Click **View Form**
8. Click **Print**

Search for Candidates Effectively

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

Type the keyword in the **Search** field and click **Go**. Options to search for “All words”, “Any word” or “Exact term” are available.

The search results are displayed in the Screen tab. The search engine picks up the keyword and displays the result that contains the keyword anywhere in the resume.

To customize your search, you can use filters. To do so, follow the steps given below.

1. Click **Advanced Search** on the left side of the window to view **Current filters** under **Screen** tab.
2. Select degrees as per your criteria. Select relevant options from **Major**, **Select Source**, and **Import Date** dropdown lists. Enter location in **Current Location** field.
3. Click **Search**.
The results are displayed under Screen tab.

How do I?

Note: You can save the searches using the ‘save search’ option.

Tip: You can also use the Search feature in **Screen** tab.

With the help of Talentpool’s Advanced Search Option you can search candidates on the basis of following criteria:

Degree- Degrees as defined by you

Major- Specializations as defined you

Status of the candidate-In-process, Not in Process or All

Source Category: Employee Referrals, Portals, Vendors or others

Source: Exact source like Naukri, Monster, referrals by a specific employee or candidates from a specific vendor

Current Location: Candidates from a specific location

Current Employer: You can search for a candidate profile using the candidate’s current company details

Phone Number: Search for a candidate profile using their phone number

Date of Birth: You can search candidate profiles on the basis of their date of birth

Last Interaction: Search through your database on the basis of your last interaction

Import Date: Resumes imported within a week, fortnight, 90 days or a year

Flags/ Categories: Resumes categorized as per flags

Search Candidates: You can define where the system should search for candidates. If you choose to search for candidates who are not in process, the system asks if it should search for rejected candidates.

Include Rejected: You can search for candidates who have been rejected and you can define the rejection stage of the candidate as well.

Note: You can see the current status of the candidate on mouse over of icon in your search results

Search by Requirement

To search by requirement, follow the steps given below:

1. Go to **Screen** Tab
2. Click **Search by Requirement** on the left panel
3. Select the right department ,location and position from the drop down
4. Click **Submit** to see the candidates who match the position criteria

View Candidate Details on Mouse-over

You can view the details of a candidate on mouse over on the name of the respective candidate. The bubble on mouse-over shows information like source, contact details, experience and more. You can select what you want to view.

To select the information that you want to view about a candidate, follow the steps given below:

1. Go to **My Account**
2. Click **Preferences**
3. Check the fields that you want information about
4. Click **Save**

Send SMS to an Applicant

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

1. Open the candidate details window by clicking on the name of the candidate. Alternately, search for the candidate by entering all or part of his name in the search box & click on the candidate name.
2. Click on the SMS icon in the top right of the candidate details window.
3. Select the mobile phone that you want to send the SMS to from the drop down list.
4. If the number on which you want to send the SMS is not in the list, select **New Number**. Enter the new number. Click **Save** to save the number in the candidate profile for future use.
5. Type your message and click **Send**.

Undo the last task

You can undo a task if you are the one who completed it by following the steps given below:

1. Open the candidate details window by clicking on the name of the candidate. You can also search the candidate by putting his/her name in the search box.
2. Click on **More** and click on **Undo Last Feedback**.

Send Mass Email to Many Candidates

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

You can send a mass email from the **Search** tab or the **Select** tab. In the **Search** tab, mass email can be sent to some or all candidates in a search result. In the **Select** tab, mass email can be sent to some or all candidates in process.

1. Click on the **Mass Email** link on the top right of the list.
In the Mass Email window, type in the subject and the text in the body of the email. Alternately, select a template per which you want to send the mail.
[Refer *Create New Template for Mass Mailing to Applicants / Candidates*].
2. Select the candidates you want to send the email to.
3. Click **Send**.

Tip: If you want to send a mass email to candidates for a specific position or at a specific stage in the **Select** tab, select that position or stage in the drop down filters. Only the filtered candidates displayed on the screen will be included in the mass email list.

Generate Appointment Letter

You can generate appointment letter for candidates by following the steps given below:

1. Go to Hire tab
2. Highlight Candidate Profile
3. Click on **More** and select **Print Offer**
4. Select the **Template** from the drop down
5. Click **Save Offer**

The offer sheet will now appear on the candidate's profile.

Set Reminders

You can set reminders for each candidate by following the steps given below:

1. Open the candidate details window by clicking on the name of the candidate. You can also search the candidate by putting his/her name in the search box.
2. Click **More**
3. Click **Set Reminder**
4. Type the date and the time
5. Click **Save**

The reminder would now be visible on your dashboard and you can also edit the saved reminder from the dashboard.

Note: You can choose to see the reminders on the calendar as well as on the **Dashboard**.

Generate List of Candidates to Call for the Day

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

1. In the **Select** tab, select a group of candidates by using the Position or Status filters.
2. Click the **Call list** link on the top right to open call list window.
3. Select candidates that you want to include in the Call List and click **Generate Call List**.
4. Click **Print** to print the list.

Note: You can also generate a call list by clicking on the **Call List Report** link in the **Reports** tab.

Change Follow-up Status of a Candidate

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

The follow-up status of a candidate is updated as he clears steps in the hiring process. To update the follow-up status of a candidate based on follow up messages, follow the steps given below.

1. Click **Select** tab.
2. Click the candidate record whose status you want to update.
3. Click **Update follow-up**.
4. Select the status to be updated from the drop-down list.
Once you click **Submit** the status gets updated and you can view the same in the candidate's interaction history.

To change the follow-up messages defined within a selection step, refer *Check Candidates* under a Specific Position

To check the candidates who are in process for a specific position, follow the steps given below:

4. Go to **Dashboard**
5. Click on a **Position**
6. You will be able to view **Candidate in Process**, **Candidates Applied** and **Rejected Candidates**

Change the Feedback Criteria for a Selection Step

Note: You can also update follow-up status from candidate details window. Click candidate record to open candidate details window.

Sort Mails in the Import tab

The mails can be sorted on the basis of columns like attachments, date, sender and subject by clicking on the corresponding columns.

Create Folders in the Inbox

To create folders in the inbox, follow the steps given below:

1. Go to **Master Lists**
2. Click **Inbox Folders Master**
3. Click **Add New**
4. Put in the desired name
5. Click **Submit**

To edit the name of the folder, click on it and to delete the folder click on the adjacent icon.

Note: Two default folders are already there, namely **Inbox** and **Sent items**.

Import Applicant's Resume into the System

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	----------------------	---	------------------	---	-------------------	--	--------------------	---	------------

To add an applicant into Talentpool, the resume needs to be imported. Talentpool helps you pick up the resume attachment in .doc, .docx, pdf or .txt format. To import resume, follow the steps given below.

1. Click **Import** tab.
2. Select the resume of the applicant whom you want to import from the Inbox.
3. Click **Import** button to open **Import** window.
The resume parser automatically extracts Name, Mobile number, E-mail and Skills. Verify if these fields are correct. To extract other fields follow the steps given below.
4. In the Import template, select source from **Source** dropdown list.
The source dropdown will show the last 20 used sources with an option to view all sources and select from it.
5. Select the relevant data and right-click. Select the relevant field from the pop-up. The content of this field is copied in the same field of Import page.
6. Click **Save**.
The resume is added into Talentpool database.

Tip:

- You can also import resumes that are in .docx format in case needs office 2007 on the server. Also need to replace the existing wordtohtml.exe with wordtohtmldocx.exe.
 - You can also use copy-paste feature or drag and drop any data from resume page into the Import page.
 - You can parse longer resumes by switching between attachments without having to reparse the resume.
-

Note: When you want to import resume embedded in the email body, select **Email body as a resume** field above Import window. Reply to the mails or forward resumes directly from the Import window.

Note:

- The parser is improved and imports maximum fields for resumes imported from Naukri, Monster, Dice and Techfetch.
 - You can configure the Import as well as resume Edit screen from **Admin → Screen Configuration**. You can also decide the mandatory fields without which the resume cannot be imported.
-

Import Resume directly from the system

To add an applicant's resume to Talentpool which you have saved in the system, follow the steps given below:

1. Click **Import** tab.
2. Click on **Upload Resume** tab on the extreme left of the window.
3. Select the resume from your system.

The resume parser automatically extracts name, Mobile Number, E-mail and Skills. Verify if these fields are correct. To extract other fields, follow the steps given below:

4. In the Import template, select source from **Source** dropdown list.
5. Select the relevant data and right click. Select the relevant field from the pop up and the contents of the field are copied in the same field of the import page.
6. Click **Save** to store it in your database.
7. Click **Save and Continue** to work on that resume

Upload Resume from MS-Outlook Inbox

You can upload resumes from Outlook to Talentpool after the latter has been integrated with the former.

Single Import from the Outlook Inbox

To import resume from Outlook inbox, follow the steps given below:

1. Select the mail
2. Click **Import**
3. Parse the resume
4. Validate the auto parsed information

To import information that has not been automatically parsed, select the information and right click. Or select the relevant field from the pop up and the data would be parsed.

5. Click **Save** to save the resume in your database

Note: This feature is only available in the Enterprise and Pro versions of Talentpool.

Note:

- The resume would not be imported to the Talentpool database if the Name, Working Since and Source fields are left blank. However it is recommended that you also fill up fields such as Location, Education and Current Employer.
 - The parsed fields in the resume would be highlighted.
-

Publish Positions for Walk-ins

Conduct walk-in drives with innumerable candidates or simply register candidates. You can now create a candidate profile without attaching a resume. To create a candidate profile, follow the steps given below:

1. Go to **Positions** tab
2. Click **Walk-ins** on the side bar
3. Select a date range
4. Click **Submit**

Create Candidate Profile Without Attaching a Resume

Conduct walk-in drives with innumerable candidates or simply register candidates. You can now create a candidate profile without attaching a resume. To create a candidate profile, follow the steps given below:

1. Go to the **Applicant Registration** Page
2. Select **Location** from the dropdown
3. Select whether you would want to register with or without reference to a specific position
4. Select **Register with Position** or **Register No Position**
5. Only when you select **Register with Position**, you will be able to select the position that you want to apply for
6. Select the position
7. Click **Submit**
8. Fill in your details in the **Registration Form**
9. Click **Submit**
10. If you have followed all the steps, you will see a “**Registration done successfully**” message
11. Click **Close** to complete the process

Send Mail Notification Confirming Receipt of Uploaded Resume

To send reminder mails to employees and vendors confirming receipt of resumes uploaded by them, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select **Send resume upload successful notification to employee** or **Send resume upload successful notification to vendor**
4. Click **Submit**

Bulk Import Resumes from Job Portals

To import resumes in bulk from job portals like Naukri, Monster, Dice and Techfetch, follow the steps given below:

1. Open the job portal you work on
2. Select the resumes you want to import
3. Click **Tools**
4. Select **Import To Talentpool**
5. Wait for the resumes to be downloaded in Talentpool The window shows the progress.

6. Click **Import All**
7. The system checks for duplicates. If it finds duplicates it gives you options to discard the current resume or continue saving it.
8. Click **Shortlist** if you want to shortlist the resumes

Bulk Import Resumes from the Outlook Inbox

To bulk import multiple resumes simultaneously from the Outlook inbox, follow the steps given below:

1. Select the mails
2. Click **Bulk Import**
3. Select **Source** and **Resume Type**
4. Fill in the required details like Current Employer and Experience
5. Specify the skills that match with the skills sets required for the position
6. Click **Submit**

You can also update candidate details that are absent or incorrect in the original resume by following the steps given below:

7. Fill in the information that you want to update
8. Click **Update** to save
9. Click **Import All** after making the respective changes

In case you do not want to update any information you directly come to Step 9 after Step 6. In case you want to fill in detailed information about a candidate while you bulk import, follow the steps given below:

10. Select the candidate
11. Fill in all the details in the import screen
12. Click **Save** to save the resume in your database

Tip: You can choose to import a resume in details if you find it more appropriate than the other ones.

Note: To Bulk Import, it is mandatory that you select a Source. Bulk Import screen would show the same screen as normal import depending on the screen configuration set by you.

In case of duplicate resume import or insufficient information on the resume(s), the system will not import the resumes. It will show this error message only when the resume does not have the name of the candidate.

To detect duplicates in the Talentpool database, follow the steps given below:

13. Click **Check Duplicate**
14. The duplicate resume would show with the fields that have matched.
15. Click **Close** if you know that it is a duplicate

If you want to compare the two resumes follow the steps given below:

16. Click on the duplicate
17. Click **Same** if the resume are same
18. Click **Different** if the resumes are different.
19. Click **Create new applicant by ignoring duplicates** if you want to import the resume.

Note: This feature is only available in the Enterprise and Pro versions of Talentpool.

Bulk Import from Desktop

To import resumes in bulk from Desktop, follow the steps given below:

1. Click Shortcut to Desktop Import

2. Click Add
3. Choose resume from Desktop
Only txt, doc, html and rtf formats are supported
4. Select all the resumes that you want to import into the database
5. Click Import
6. Fill in your Talentpool login details

Select Source and Resume Type (refer *Bulk Import Resumes from Job Portals* Steps 4-9.)

In case you do not want to update any information you directly come to Step 9 after Step 6.

Note: To Bulk Import, it is mandatory that you select a Source.

In case of duplicate resume import or insufficient information on the resume(s), refer *Bulk Import Resumes from the Outlook Inbox* Steps 10-16

Note: This feature is only available in the Enterprise and Pro versions of Talentpool.

Delete resumes in Bulk

To delete resumes in bulk, follow the steps given below:

1. Go to the **Screen** tab
2. Select the relevant resumes
3. Click **Delete** to delete those resumes

Single Import from Desktop

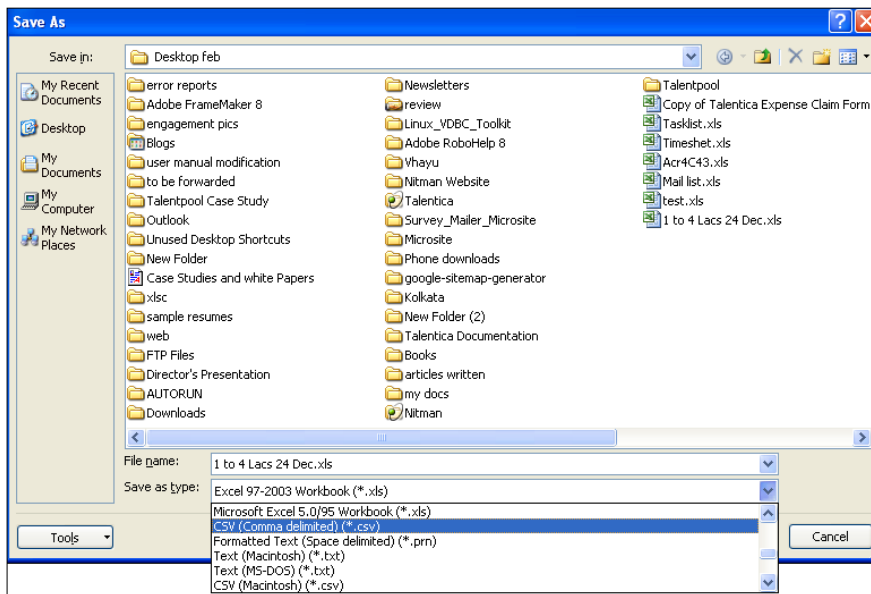

To import resumes singly, follow the steps given below:

1. Click **Shortcut to Desktop Import**
2. Click **Add**
3. Choose resume from Desktop
Only txt, doc, html and rtf formats are supported
4. Select the resumes that you want to import into the database
5. Click **Import**
6. Fill in your Talentpool login details

Import From CSV file

To import data on an excel file follow the steps given below:

1. Open the excel file
2. Click **File**
3. Click **Save as**
4. Choose CSV (comma delimited) from the Save as type dropdown
5. Click **Save** to save your excel file as a CSV file
6. Click **Import**

7. Select the CSV file that you want to import from the system.
8. Map the columns from the .CSV file to your database
(Map only those columns which you would also like to see in your Talentpool database)
9. Click **Import** to see the imported data
10. Check the imported data for errors
11. Click **Import All** in case there are no errors
12. Click **Cancel** if you find errors in the data

Note: CSV file import is available in the Manage Users section and Master Lists like the branches, degree, institute, locations, skills and source master.

Export to Excel

To export the information on an excel sheet from the Select or Hire tab, follow the steps given below:

1. Click on the **Excel Import** icon
2. Select fields that you require in the excel sheet
3. Click **Submit** to create the excel sheet

Note: Apart from Select and Hire Tab, export to excel is also available in some of the Master Lists.

Shortlist a Candidate Directly after Importing His Resume

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

You can shortlist a candidate immediately after importing it. Click **Save and continue** in the import window instead of **Save**. The candidate gets shortlisted.

Note: Refer *Import Applicant's Resume into the System on page 51* to know how to open import window.

Schedule Interview/ Written test

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

To schedule an interview /written test, follow the steps given below.

1. Click **Dashboard** tab and view **To do list**.
2. Click the task **Schedule an interview/written test**.
3. Select interviewers. Enter date and time of interview. Select relevant options in **Email Requests** and **SMS Requests**.
4. Click **Save**.

The interview schedule is displayed in **Calendar** tab.

Note: You may click the candidate record for which you have been assigned the task of scheduling interview. Click **Schedule** in candidate details window.

Note: User can view only his/ her appointments by checking the **Show only my appointments** checkbox.

Send SMS / E-mail Interview Reminders to Candidates and Interviewers

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

You can set reminders at the time of scheduling an interview. Refer *Schedule Interview/ Written test*.

Note: Make sure you select **Remind Interviewers** and **Remind candidate** in **SMS/ E-mail Requests** field.

View Candidate Interaction History

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

With Talentpool, it is easy to view all the transactions done with the candidate. To view interactions with the candidate, follow the steps given below.

1. Search the candidate whose interactions you want to see.
2. Click the candidate record to display details of the candidate. The interaction history is displayed in the right side of this window.

Note: Interaction includes messages, emails, phone calls, and status of various stages in selection process.

Blacklist Candidate Profile

To blacklist a candidate profile, follow the steps given below:

1. Select a **Candidate Profile** from Select or Hire tab
2. Click **More**
3. Select **Blacklist**
4. State a Reason
5. Click **Blacklist**

The candidate profile would still show up in search results. Blacklisted candidates do not appear on default search. They will only be visible when the filter is set to “Blacklisted Candidates”. To search for blacklisted candidates, go to Search -> Current Filters -> Under Search Candidates, select Blacklist.

The blacklisted candidate profile can be reverted to white list by users who have the permission to blacklist candidate profiles.

Note: Blacklisted candidate profile will be rejected if it has been selected for a particular position.

Define Access Permission to Blacklist Candidate Profiles

To define this permission, follow the steps given below:

1. Go to **Admin**

2. Click on **Manage Users**
3. Click **Advance Permissions**
4. Select **Blacklist Candidate**
5. Click **Save**

Label Candidate Profile as Confidential

To label a candidate profile as confidential, follow the steps given below:

1. Go to **Screen**
2. Select the respective candidate
3. Click **More**
4. Select **Confidential** to label this profile as confidential

Store confidential data fields such as date of birth, passport number, current CTC, expected CTC, offered CTC, offered basic salary, and applicant text resume, in an encrypted form in the database. Confidential profiles are visible only to those users who have access to confidential profiles. To define permissions for confidential profiles, click *Define Access Permissions for Confidential Profile*.

Configure CTC related Confidential Fields in Candidate Profile

To configure CTC confidential fields in candidate profile, follow the steps given below:

1. Go to **Admin**
2. Click **Applicant Screen Config**
3. Select **Confidential** against Field that is to be made confidential
4. Click **Save**

Note: You can make fields such as Target CTC, Basic CTC, Designation offered and Level Offered confidential.

Define Access Permissions for Confidential Profile

To define access permissions for confidential candidate profiles, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Users**
3. Select the user that who you want to define rights for
4. Click on the **Advance Permissions** icon
5. Select between the two options under **Confidential Profile Permission** as per your requirements
6. Click **Save** to save the changes

Specify when a Candidate should be moved from the Select tab to the Hire tab

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

You can define in the hiring process itself when to move a candidate from select tab to hire tab.

To do so, follow the steps given below.

1. Select position under **Position** tab and click **View Process**. This shows current selection steps.
2. Click **Edit**.
3. Click the step where you want to move a candidate to hire tab.
4. In **Selection Stage** field, select **Accept**.
5. Click **Save**.

Candidate is moved to hire tab when he qualifies this stage.

Add More Than One Educational Degree to Applicant's Process

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

1. Click **Import** tab.
2. Select the resume of the applicant from Inbox.
3. Click **Import** to open Import page.
4. From the Resume page, select the details of Education, drag and drop in **Education** field of the Import page. Select the details of Year, Institute, Degree, Branch, & Class from the Resume page. Drag and drop these in the respective fields in Import page one by one.
5. Click **More** to add another degree.
6. Click **Save and Continue** to start working on the candidate OR click **Save** for future action.

Move a Candidate to the Next Selection Step

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

For every selection step, user is marked as Decision-maker. He can move a candidate to the next selection step.

Refer Check Candidates under a Specific Position

To check the candidates who are in process for a specific position, follow the steps given below:

7. Go to **Dashboard**
8. Click on a **Position**

11. Select **Forward Resume**
12. Click **Attach Resume** to attach the resume of the candidate

- In case you have not attached the resume of the candidate, the receiver will be able to click on the name of the candidate and view his/her profile.
13. Enter the email address where you want to forward the resume
 14. Click **Send**
 - 5.
 - 6.
 7. Enter Feedback for a Candidate I have Interviewed.
 8. Enter your feedback.
 9. Select **Upgrade to Next Step**. (This Next step will be as per selection process defined for the position)

The candidate is moved to the next selection step.

Define Permission to Move Candidate to Other Position

To define permission to move the candidate to other position, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Role Access**
3. Scroll down to **Selection Process**
4. Select **Move to other Position**
5. Click **Save**

Note: HR managers, Administrators and CXOs are permitted by default to move candidate to other position.

Reschedule an Interview that has Already been Setup

✓	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	--	-------------	---	-----

Interview can be rescheduled only after entering feedback, which confirms attendance for the scheduled interview. When you open a candidate record, you can see which user is supposed to enter a feedback.

To know how to enter feedback, refer *Forward Candidate Resume*

To mail candidate resume to an interviewer, follow the steps given below:

15. Go to **Select, Hire or Search**
 16. Select candidate(s) whose resume you want to forward
 17. Click **More**
 18. Select **Forward Resume**
 19. Click **Attach Resume** to attach the resume of the candidate
- In case you have not attached the resume of the candidate, the receiver will be able to click on the name of the candidate and view his/her profile.
20. Enter the email address where you want to forward the resume
 21. Click **Send**

Enter Feedback for a Candidate I have Interviewed *on page 38*.

To reschedule an interview follow the steps given below.

1. Click **Calendar** tab. It displays already scheduled interviews.
2. Click the Candidate to open candidate details window.
3. Click **Schedule**.

Refer Schedule Interview/ Written test to schedule an interview.

Note: Interviewer can also confirm attendance of a candidate now provided he has been given the rights.

Print List of Interviews for the Day

✓	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	--	-------------	---	-----

You can view and print the list of interviews for the day for your ready reference. Follow the steps given below.

1. Click **Reports** tab.
2. Click **Interview list**.
3. Enter the dates.
4. Select **Users** and **Report Format**.
5. Click View Report

Create ORG Hierarchy

To create an organization hierarchical chart, follow the steps given below:

1. Go to **Admin**
2. Click **Manage User Hierarchy**
3. Click **Add New**
4. Select a **User** and Select a person to be **Assigned Under**
5. Click **Submit**

Note: Managers can view details of all positions assigned to users under him/her even when the manager is not assigned to the position.

Create User with Specific Role

	Requisitioner		Recruiter	✓	HR Manager		Interviewer		CXO
--	---------------	--	-----------	---	------------	--	-------------	--	-----

To create new users, follow the steps given below.

1. Click **Admin**.
2. Click **Manage Users** to view the current users and their roles.
3. Click **Add New**.
4. Enter necessary information in the fields. Select the role that you want to assign to the user and click **Save**.
5. You can see the newly added user name with role in **Manage Users** window.

Note: You can also sort on the basis of Username, User and Role.

As an HR Manager Create/Change Password of the User

	Requisitioner		Recruiter	✓	HR Manager		Interviewer		CXO
--	---------------	--	-----------	---	------------	--	-------------	--	-----

To change the password of the existing user, do the following.

1. Click **Admin**.
2. Click **Manage Users** to view the existing users.

3. Select the user whose password you want to change.
4. Click **Change Password** to open Change Password window.
5. Enter new password and click **Save**.

Note: You can also sort on the basis of Username, User and Role.

Replace Old Resume with New Resume

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

Candidate needs to forward his updated resume to Talentpool. When his updated resume appears in the inbox, follow the steps given below.

1. Click **Import** tab.
2. Select resume of the candidate from the inbox.
3. Click **Attach to Candidate record**.
4. Type the candidate name in the **Search candidate** field and click **Go**. Candidate's name will appear in the **Select candidate** field.
5. Select the candidate from the **Select** field.
6. Select the **Replace original resume** check box and click **submit**.

Note: In case the resume does not exist in the resume bank, you will not see the name in the select candidate field.

Create New Template for Mass Mailing to Applicants / Candidates

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

You can create your own email template. It can be global (Every user is able to use it) or private (only for the user who creates).

To create a new template for mass mailing to applicants /candidates, do the following.

1. Click **Masters** tab.
2. Click **Template Master** to view already available templates.
3. Click **Add New**.
4. Type name in **Template Name** field. Select the variables (Users or applicants) from **Template for** dropdown list. The predefined fields of respective variables appear in the right side of the window. Select and click middle arrow to copy the fields in the **Contents** field.
5. Click **Save**.
You can see the newly added template in **Template master**.

Change My Password

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

Any user can change his password as and when required. To change your password, do the following.

1. Click **My Account** at the top-right side of the window to view your profile.
2. Click **Change Password**.
3. Enter your new password and click **Save**.

Now you can use your new password.

Send Outlook Meeting Requests to Interviewers

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

Follow the steps given below to send outlook meeting requests.

2. Click the task Schedule an interview in **To do** list.
3. In scheduler window select the interviewer or interviewers and enter necessary details.
4. Click **Save**.
5. Click **OK** in appointment notification window

Forward Resume of a Candidate to Another User with a Message

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

Talentpool's messaging feature helps users to collaborate and work together. You can see the messages under **Dashboard** tab. In case you want to forward resume of a candidate to another user with some comment, you can do so by using Message feature. To do so, follow the steps given below.

1. Locate the candidate in the database by using **Search** option.
2. Click record of the candidate to view details.
3. Click **Message** on top-right side of the window.
4. Enter user name and message in the message window.
5. Click **Submit**.

Note: You can also use Message feature through **Select** tab. For this, locate the candidate under **Select** tab. Select the candidate and click **Message** in the top-right side.

Limit My Search to Recent Candidates Only

✓	Requisitioner	✓	Recruiter	✓	HR Manager	✓	Interviewer	✓	CXO
---	---------------	---	-----------	---	------------	---	-------------	---	-----

Talentpool's ranked searching feature display can be customized. You can sort the candidates' list by applying filters like Relevancy, Experience and Import date. To limit your search to recent candidates only, follow the steps given below.

1. Click **Advance Search** link in the left side of the window to open **Current filters** under **Screen** tab.
2. Type the keyword for your search.
3. Select relevant option from **Import date** dropdown list.
4. Click **Search** to display the results.

Attach Email with an Applicant

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

It is possible to add any new information to an already imported applicant. To update resume with additional information received from the candidate, follow the steps given below.

1. Click **Import** tab.
2. Select email of the applicant in the inbox.
3. Click **Attach to candidate record** on the top-right side of the window.
4. Type the candidate name in the **Search candidate** field and click **Go**.
Candidate's name will appear in the **Select candidate** field.
5. Select the candidate from the **Select** field and click **Submit**.

Note: In case the resume does not exist in the resume bank, you will not see the name in the select candidate field.

Update Master Lists

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

Resume parser picks up all educational details and skill sets specified in the **Master Lists** tab. In case you want to add or edit any educational details or skill sets into Master Lists, follow the steps given below.

To add institute, degree, branch of degree, skills, or sources Click respective links given in the Masters on left side of the window in **Master List** tab. You can also edit or delete specific fields in the respective masters.

Note: Aliases field in Masters help resume parser in picking up the particular details effectively from the resume.

Categorize Educational Fields as per Degrees in Master Lists

To categorize educational fields as per UG and PG degrees, follow the steps given below:

1. Go to **Master Lists**
2. Click **Degree Master**
3. Click **Add New**
4. Select Degree Type
5. Enter Degree Name

6. Click **Submit**

Note: Aliases field in Masters help resume parser in picking up the particular details effectively from the resume.

Specify Additional System Fields

To specify additional system fields, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select **Business Unit and Cost Center**
4. Click **Submit**

Note: These system fields are applicable only for Positions and Users. You can change the label of the fields as per your requirement. Admin can enable or disable the additional system fields from **Application Settings**.

Upload Documents to the Candidate's Profile

To upload documents to a candidate's profile

1. Open the candidate details window by clicking on the name of the candidate. Besides search for the right candidate by entering all or part of his name in the search box and click on the candidate name.
2. Click on the **More+** icon and select the option called **Upload File**.
3. Browse your system and upload the document to the candidate's profile.
4. Once the document is uploaded it would be visible in the candidate details window in the **File name** segment.

Upload Documents for Joined Candidates

To upload documents for joined candidates, follow the steps given below:

1. Go to the **Hire** tab
2. Click on the candidate whose document you want to upload
3. Click **Upload** file
4. Browse and select file to upload
5. Click **Upload**

Maintain recruitment expenses on Talentpool

Keep a track of all the expenses of the recruitment related activities. To do the same follow the steps given:

1. Click **Expenses**.
2. Click on the **Add New** tab.
3. Enter the relevant data and submit it.

Whenever the **Expenses** tab is clicked upon the expenses and the purpose would be right in front of you on the screen.

Add new Expense Types

Expense types may differ, to add expense types follow the steps given below:

1. Click on **Expenses**.
2. Click on **Expense Types** on the pane in extreme left.

Use Advanced Duplicate Detection while Importing.

When you import a resume, the system checks for duplicates based on the duplicate detection settings.

Click **Okay** to see the duplicate records otherwise click **Cancel** to import the resume or check duplicates at the next level.

Follow the steps given below to save duplication of the same resume at the next level. The detection is done when you try to save the resume. After you have extracted the skills of the candidate follow the steps for a Duplicate Detection:

1. After you fill up all the details on import screen, click on **Save**.
2. If system finds any duplicate resumes in Talentpool, all such candidates will be listed on the next screen. The resumes which the system recognizes as duplicates are pulled up in another window.
3. To ignore click **Create new applicant by ignoring duplicates**.
4. To compare the current resume with duplicate found in database click on candidate name. The original and the duplicate resume are visible side by side so that you can compare.
5. If the resumes are same click on **Same**, if not click on **Different**.
6. If you click on **Same**, the system would ask if you want to replace the duplicate resume with the new one. If you want to replace, click **Yes**; if not click **No**.

Set Flags

To set flags to easily distinguish one candidate from the other, follow the steps given below

1. Open the candidate details window.
2. Click on **Set Flag**.

The selected candidate would be flagged as per your definition of that particular flag.

You can also set public and private flags by following the steps give below:

1. Go to **Admin**
2. Click **Application Settings**
3. Put in the number of public and private flags that you want as per your requirement

Note: You can change the flags from **Select** as well as **Hire** tab for selected candidates.

Schedule Reports

Reports can be prepared on the basis of source, position and action. To schedule reports and send to all or specific users follow the steps given below:

1. Click on **Reports** tab.
2. Click **Schedule This Report**
3. Choose the **Frequency, day** and **time** for the report to be generated.
4. Choose the **Start Date**
5. Put the email address of the person whom you want to send the reports to.
(You can also pick the right email address from the suggestions that the system provides you.)
6. Click **Save** to send the mail.
7. If one of the receivers does not have the rights to receive the report, a window pops up stating that this particular user does not have access to this report. You can check the box adjacent to the name of the user and allow that user to access that one particular report. Click **Save** to send the mail or click **Back** to make changes.

Note: You can see the recently sent reports and the receiver when you click on a report.

Create Source Category

To create source category, follow the steps given below:

1. Go to **Master Lists**
2. Click **Source Master**
3. Click **Add New**
4. Add the name of the source category
5. Click **Submit** to create a new source category

Create Sources within a Category

To create source(s) within a category, follow the steps given below:

1. Go to **Master Lists**
2. Click **Source Master**
3. Click on the sources
4. Click **Add New**
5. Add the name of the source
6. Click **Submit** to add the source in source category

Filter Candidates According to the Users and Actions Required

You can filter candidates according to the user and actions required under the Select tab.

The filter for users will show candidates who are awaiting action by users. Therefore you can sort candidates on the basis of users who is/are working on them.

The filter for actions will show the candidates awaiting a particular action. Therefore you can sort candidates on the basis of the action they are awaiting.

To use the filters, follow the steps given below:

1. Click **Select**
2. Click on **Action** to use the action filter
3. Click on **User** to use the user filter
4. Click on the name of the action or user to view the candidates respectively

Note: These filters will display data in combination with other selected filter. So you can use multiple filters at a time.

Budget Tracking

Activate Budget Tracking Module

The Budget Tracking module remains in-active by default. However in case you want to use it, you can follow the steps given below:

Go to **Admin**

Click **Application Settings**

Change the **Budget Module Status**.

With the help of this module, you can choose to:

- Track- Gather information about the recruitment spending of a department
- Enforce – Limit the budget of a department to a certain amount and enforce it

Add a Budget Item

To create a budget item, follow the steps below:

1. Go to **Budget** tab
2. Click **Add New**
3. Enter all the mandatory fields marked with an asterisk (*)
4. Click **Save**

When a budget item is created, a to-do item is generated and a mail is sent to the budget owner and the budget tracking begins. The owner needs to activate the budget item.

Note: The budget item can be tracked using filters such as Budget item name, Department, SubDepartment, SubSubDepartment, Owner, Positions, Grade, Band and Status.

The hire-by-date for a particular position can be set as per the grade of the employee in the positions tab. Selecting a grade will filter the budget item and will reset the hire-by-date according to the grade attribute.

Edit a Budget Item

Editing of the budget item can be done by the owner/creator of the budget item. In any case, the owner is informed of the change by mail after such changes are made. To edit a budget item, follow the steps below:

1. Go to **Budget** tab
2. Select the budget item to be edited
3. Click **Edit**
4. Make the required changes
5. Click **Save**

Transfer a Budget Item

A budget item can be transferred by the creator or owner of the item to another budget item. To transfer a budget item, follow the steps given below:

1. Go to **Budget** tab
2. Select the budget item to be transferred
3. Click **Transfer Budget**
4. Fill in the **heads to transfer** and the **transfer to budget item**
5. Click **Submit**

Delete a Budget Item

A budget item can be transferred by the creator or owner of the item to another budget item. To delete a budget item, follow the steps given below:

1. Go to **Budget** tab
2. Select the budget item to be deleted
3. Click **Delete**
4. Click **Ok**

Salary Structure Generation

Define Salary Category

To define salary category, follow the steps given below:

1. Go to **Master Lists** tab
2. Click **Salary Component Category**
3. Click **Add New**
4. Enter **Salary Category Name** such as Variable/Fixed
5. Click **Submit** to save

Define Salary Components

To define salary components, follow the steps given below:

6. Go to **Admin**
7. Click **Salary Components**
8. Click **Add New**
9. Enter **Salary Component Name** such as HRA/Conveyance Allowance
10. Select **Salary Component type** whether this component is monthly or yearly
11. Select **Salary Category**
12. Click **Submit** to save

Define Salary Calculation

To define salary calculation, follow the steps given below:

1. Go to **Masters List**
2. Click **Salary Calculation**
3. Click **Add New**
4. Select **Grade**
5. Select **Salary Component**
6. Enter **Formula**
7. Enter **Max limit**
8. Check the box if you want to choose this component as adjustable
9. Click **Submit**

Note:

- You can select any one salary component as adjustable. This helps adjust the difference between total CTC and sum total of all components.
- Formulae can be either basic or annual gross CTC*.

*The term Annual Gross CTC is only for reference. It can be renamed by going to Admin-> **Application Settings**-> scroll down to **Label for salary calculation variable**.

Propose Offer

To propose an offer for a candidate in the Hire stage, follow the steps given below:

1. Go to **Hire tab**
2. Click on the **Candidate's Profile**
3. Click **More** on the candidate information window
4. Click on **Offer Proposal Screen**
5. Fill in the required fields
6. Click **Calculate** and make more changes if required
7. Select **Offer Proposal Action-** Submit for approval/ Approve/ Reject
8. Click **Save**

Configure Offer Code Template

To configure offer code template, follow the steps given below:

9. Go to **Admin**
10. Click **Application Settings**
11. Scroll down to **Offer Code Template**
12. Define the offer code template by selecting values from the given options
13. Click **Submit**

Generate Offer Sheet

To generate offer sheet, follow the steps given below:

14. Go to **Hire tab**
15. Select a candidate profile for whom you want to generate the offer
16. Click **More**
17. Click **Generate Offer**
18. Select **Generate Offer** to create a new offer or **Modify offer** to use an existing offer.
19. Click **Next**
20. Enter the required information and select **Offer Template**
21. Click **Next**
22. Select **Offer Generation Format-** Word/Excel or PDF
23. Click **Save Offer**

Note: Applicant fields include Applicant Id, Skills, Experience and Education Related Fields.

Reports

	Requisitioner	✓	Recruiter	✓	HR Manager		Interviewer	✓	CXO
--	---------------	---	-----------	---	------------	--	-------------	---	-----

Report Designer

Talentpool's report designer enables creation of customized reports with the ability to define the sharing, viewing, editing, and deletion options of these reports.

How do I create a Customized Report?

Follow the instructions below to create a customized report:

1. Go to **Report Tab**
2. Click **Add New** on the left panel
3. Select the type of data you wish to report on from **Report Type** and Click **Next**
4. Select Columns that you require in the report and Click **Next**
5. Put the report columns in order of viewing preference and Click **Next**
6. Select the report column for sorting and Click **Next**
7. Select filters to display when you run the report and Click **Next**
8. Fill in a **Report Name and Report Description**
9. Select the kind of access you want to define for the report from **Report Access** and Click **Save**
The report is available under **Custom** in the **Report Tab**.

Note: Report Designer feature is available only with some versions of Talentpool.

Note: If you choose to share the Report, you can define the user levels who can view the report from **Share Report With**.

How do I View a Customized Report?

1. Go to **Report Tab**
2. Go to **Custom Reports** section
3. Click on the **Report** to be viewed
4. Select the required **Filters**
5. Click **View Report**

The report can be opened or saved in .xls format.

How do I Edit a Customized Report?

Follow the instructions below to edit a customized report:

1. Go to **Report Tab**

2. Go to **Custom Reports** section
3. Click **Edit**

How do I Delete a Customized Report?

1. Go to **Report Tab**
2. Go to **Custom Reports** section
3. Click **Del**

How do I create a Pre-formatted/ Pivot Table Report?

Reports can be created in two formats - tabular or pre-formatted. The pre-formatted table is a user defined report in which pivot table, chart, bar graphs, etc can be created. However to create a pre-formatted report you must first define and create the report for the first time. To create a pre-formatted report, follow the steps given below:

1. Go to **Reports** tab
2. Click **Add New**
3. Select **Pre Formatted** and Click **Next**
4. Select the **Report Type** and Click **Next**
5. Select **Columns** and Click **Next**
6. Click **Upload File**
7. Select file and click **Submit**
8. Click **Next**
9. Select **Sheet** and **Row**
10. Select **Column Mapping**
11. Select **Filters**
12. Enter Report Name and Click **Save**

How do I design a Customized Summary Report?

Customized summary report is the newer version of custom reports that can be designed, edited or deleted by users who have masters and admin rights. This type of report will only show data for positions that have been migrated to the new step master. To design a customized summary report, follow the steps given below:

1. Go to **Reports** tab
2. Select a **Custom Report** you want to design
3. When the application displays the information click **Ok**
4. Click **Customize Report**
5. Select attributes for **Columns, Rows and Values** from the available fields
6. Click **Next**
7. Select **Filters** and Click **Next**
8. Enter **Report Name** and **Report Description**
9. Click **Save As**

Note:

- If you want to save the changes to the same report, click **Save**.
- To view inactive positions, go to Reports->Select a report under Summary->Click **Customize Report** ->Check **Show positions with no activity**.

To view a customized summary report, follow the steps given below:

1. Go to **Reports** tab
2. Select a **Summary** Report
3. When the application displays the information click **Ok**
4. Click **Run Report**

How Do I Define Access to Customized Summary Reports?

Access to customized summary reports can be defined user wise or role wise.

To define role wise access to view customized summary reports, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Role Access**
3. Select the **Role** that you want to define access for
4. Scroll down to **Reports** and check the report you want to give access to. To restrict access, uncheck the report.
5. Click **Save**

To define role wise access to add/modify customized summary reports, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Role Access**
3. Select the **Role** that you want to define access for
4. Scroll down to **Add/Modify Summary Reports**
5. Click **Save**

To define user wise access to view customized summary reports, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Users**
3. Click on **Advance Permissions** of the user
4. Scroll down to **Reports** and check the report you want to give access to. To restrict access, uncheck the report.
5. Click **Save**

To define user wise access to add/modify customized summary reports, follow the steps given below:

1. Go to **Admin**
2. Click **Manage Users**
3. Click on **Advance Permissions** of the user
4. Scroll down to **Add/Modify Summary Reports**
5. Click **Save**

Hiring Activity Report

This report shows the number of candidates in process for each stage including hire by date, date created, position owner, date approved, vacancies, department, location, applied candidates and shortlisted by HR.

Hiring Activity Report

Date : 13-Apr-16 to 13-Apr-16

Blacklisted Candidates Report

You can view all the candidates you have blacklisted in the blacklisted candidates report. To view the report, follow these steps:

1. Go to Reports tab
2. Select **Blacklisted Candidates Report** under **Status**
3. Select the preferred **Date Range**
4. Click on **View Report**

BlackListed Candidates Report

Date : 18-Apr-18 to 18-Apr-18
Report for : Positions: |

Employee Portal

This application comes as a supplement with Talentpool. It helps the employees to submit their referrals for relevant positions and track their progress in the entire recruitment cycle. Configure and post internal job postings and external job postings to different tabs.

It is an easy to use application wherein the employee sees only the open positions and the candidates that he has referred. With the incorporation of Captcha, it also becomes a highly secure application.

How do I register on Employee Portal?

Follow the instructions below to register yourself on Employee Portal:

- Go to **Click here**
- Fill in the mandatory details
- Click **Next** to directly log in to the application

Registration by employees on employee portal can also be deactivated. Instead, Talentpool admin can create user ids for employees. (Refer to *How do I create users (Login IDs)?*)

To deactivate registration by employees on the employee portal go to Admin -> Employee Portal Settings -> Uncheck allow employees to register / request for forgot password-> Click Submit.

Note: Employee Code is mandatory to register for Employee Portal. Only one user can be created with the help of one Employee Code.

Open Positions

As soon as the employee logs in to the portal, he would see the open positions published to the employee portal and the qualifying criteria for each position.

Note: You can filter the positions only on the basis of primary and secondary skills that are associated with the published position.

Refer a Friend

To refer a friend for a particular position, follow the steps given below:

- Click **Position Name**
- Click **Refer a Friend**
- Fill in the required details
- Upload resume
- Click **Next**

The resume would be uploaded and the candidates would be visible under **My Candidates** tab.

Email to Friend

To email a certain position to a friend, follow the steps given below:

- Click **Position Name**

- Click **Email to Friend**
- Fill in the email address
- Click **Send**

Publish Positions as Internal Job Postings or External

Configure and post internal job postings and external job postings to two different tabs.

To publish positions differently, follow the steps given below:

- Go to **Positions** tab
- Click **Employee Portal** in the side bar
- Select a position and click **Publish**
- Select the **date range**
- Choose between **Employee can Apply**, **Employee can Refer** or **Employee can Refer and Apply**
- Click **Submit**

How do I track the progress of the candidate?

To know the status of your candidates click on my candidates and you can see the stage that your candidate is in.

Note: You can sort using filters like Candidate Name, Position Title, In Process, Joined, and Rejected

Is it possible for an existing employee to apply for an open position in the company?

Yes, existing employees can apply for an open position only when you have activated the same in Application Settings. To enable an existing employee to apply for a job, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Check **Employee can apply for job**
4. Click **Submit**

Once you have enabled this, you will have to specify if the resume that you are importing is of an employee or not. In case it is an employee, you need to enter the employee's code, otherwise the resume will still be considered as non-employee resume.

Where would the resumes sent by employees show on Talentpool's main application?

The resumes sent by the employees would automatically show on the To-do list of the assigned recruiter from where they can be taken further through the whole recruitment cycle.

How would the employee know about the current status of his candidates?

The status of the candidates would be automatically updated in Employee Portal as and how it is changed in the main application of Talentpool. The employee will also be sent a mail regarding the candidate's progress and status-hired or rejected.

How do I configure the Import screen when employees are importing the resumes for referrals?

To configure the import screen for the employee portal, follow the steps given below:

1. Go to **Admin**
2. Click **Screen Configuration**
3. Check the fields that you want on the employee screen
4. Click **Save**
5. Restart the system to see the changes in the employee portal

How do I send a notification to HR team as soon as an employee uploads a resume?

To send email notification to the HR team as soon as an employee uploads a resume, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select **Send resume upload notification by Employee to HR team**

If this setting is enabled, email will be sent only to those members of the HR team who are part of the selection process for the position for which resume is uploaded.

How do I send a notification to the employee when the referral moves to the next round of interview?

An e-mail intimation is sent to the employee when his referred candidate moves up to the next round of interview. To send email notification to the employee when the given referral moves to the next step of the interview, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select **Intimate to employee when his referred candidate is escalated to next level**

How do I send a notification to the employee when the referral is rejected?

To send email notification to the employee when the given referral is rejected, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select **Send candidate rejection email to Employee**

If this setting is enabled, email will be sent to the employee who referred the rejected candidate.

How do I send a notification to the employee when the referral joins?

To send email notification to the employee when the given referral moves to the next step of the interview, follow the steps given below:

1. Go to **Admin**

2. Click **Application Settings**
3. Select **Intimate to employee when his referred candidate has joined the Company**

How do I restrict sending of CV from the employee portal after an “X” date?

To determine a start and end date for submitting referral CVs, follow the steps given below:

1. Go to **Positions Tab**
2. Click on **Employee Portal**
3. Click on **Status** of the Position
4. Enter the required dates in the ‘**Publish from**’ and ‘**to**’ fields
5. Click **Submit**

Can I select multiple “Minimum Education” and “Branches” in Position Requirements?

To define multiple options and select multiple options for the ‘Minimum Education’ field and ‘Branches’ field while defining requirements for a position, follow the steps given below:

1. Go to **Positions** tab
2. Select a position
3. Click **View**
4. Go to the **Requirements** tab
5. Click **Edit**
6. Select any number of options for the **Minimum Education** and **Branches** field
7. Click **Save**

How do I send a notification to the employee when the referral is rejected?

To send email notification to the employee when the given referral is rejected, follow the steps given below:

1. Go to **Admin**
2. Click **Application Settings**
3. Select **Send candidate rejection email to Employee**

If this setting is enabled, email will be sent to the employee who referred the rejected candidate.

Candidate Portal

Talentpool helps you host a candidate portal on your website using which the candidates can manage their own applications. The candidate portal allows the candidate to

- Apply for jobs easily
- Gives candidates the tools to create their own profile
- Allow candidates to upload documents

How will the candidate register?

To apply for a specific open position, the candidate will have to create his/her profile by following the steps given below:

1. Click on **Sign-In** in the bottom
2. Click **Sign-up** to create a profile
3. Enter your user name and password and click signup again to log in
4. Click **Yes, I accept** to agree to the privacy terms and conditions
5. Once the candidate signs up and logs in, he/she will be able to view and apply the open positions that have been published on the website

How will a candidate apply for a specific position?

The candidate would need to register to apply. If the candidate is registered, he/she would see the published positions enlisted on the home screen. Candidates can also search through openings using name, skills, department, or location.

1. Click on **Apply**
2. Choose your resume from the system. You can also drag and drop files.
Once the resume is uploaded, the system shows “Uploaded Successfully”. You can choose to remove resume and upload a different file.
3. Once uploaded, click **Next** to save
Fill in your personal details such as mobile number, date of birth and location to submit the application
You could choose to fill in the rest of the details such as personal experience, education and work experience
4. Click **Submit** to apply
5. Status button under this position now shows to “Applied”

How will the candidate view his/her applications and track the status of application?

To view your applications, follow the steps given below:

1. Sign in to your candidate account
2. Go to **My Applications**
3. All the positions that you have viewed are enlisted on this page
4. View the status of your application beneath each position at the right corner

How will the candidate edit his/her profile?

To edit his/her profile, the candidate will have to follow the steps given below:

1. Go to **My Profile**, once you are logged in
2. Click on the pencil () icon at the top right
3. Update your information and click **Update**
4. **Browse and choose** new resume to upload and update resume
5. Click **Update** to save the new resume

How will the candidate upload additional documents?

To upload documents, the candidate will have to follow the steps given below:

1. Go to **My Profile**
2. Scroll down to the Documents section
3. Click **Browse** to upload documents from the system
4. Click **Add** to save the new documents

How will a candidate change password for his/her profile?

To change password, the candidate will have to follow the steps given below:

1. Click on the dropdown arrow beside the name
2. Select **Change Password**
3. Enter the new password and confirm password
4. Click **Change Password** to update the system with the new password

ERP/HRMS Integration

Talentpool can be integrated with your existing ERP/HRMS for better candidate reports. You will now be able to separate IJP's and external job postings for a seamless position creation and candidate data migration after selection. To know more, get in touch with the Talentpool Support team at support@thetalentpool.co.in.

Social Media Integration

Talentpool can be integrated with social networking sites like Facebook and LinkedIn to leverage candidate profile information. Open positions can be published to these sites, allowing applicants to apply for jobs easily. Company brand can also be marketed through social media websites to encourage engagement with passive and active candidates.

Note – Social Media Integration is not default functionality. Please check with Talentpool support team for upgrade.

How do I integrate Talentpool with LinkedIn and Facebook?

To integrate Talentpool with LinkedIn, follow the steps given below:

1. Go to **Admin**
2. Click **Social Network Settings**
3. Under LinkedIn settings enter **Client Id**, **Client Secret** and **Company Ids**
4. Click **Save**

Note: Company Ids entered here will be used on Candidate's social profile to search his/her linked-in connections from these companies.

To integrate Talentpool with Facebook, follow the steps given below:

1. Go to **Admin**
2. Click **Social Network Settings**
3. Under Facebook settings enter **Client Id** and **Client Secret**
4. Click **Save**

6641511	LinkedIn-Group

How do I integrate Talentpool with LinkedIn and Facebook groups/ company?

To integrate Talentpool with LinkedIn and Facebook groups/company, follow the steps given below:

1. Go to **Admin**
2. Click **Social Network Settings**
3. Under Group/Company configuration, select **Group/Company Id**,
4. Select **Group/Company Name**
5. Select **Group/Company URL**
6. Select **Media Type**
7. Click **Save**

Note: These groups/companies will be used for position posting. Some of the groups may require the users to be a member to be able to post to them.

How do I import information from my Social Profile into Talentpool?

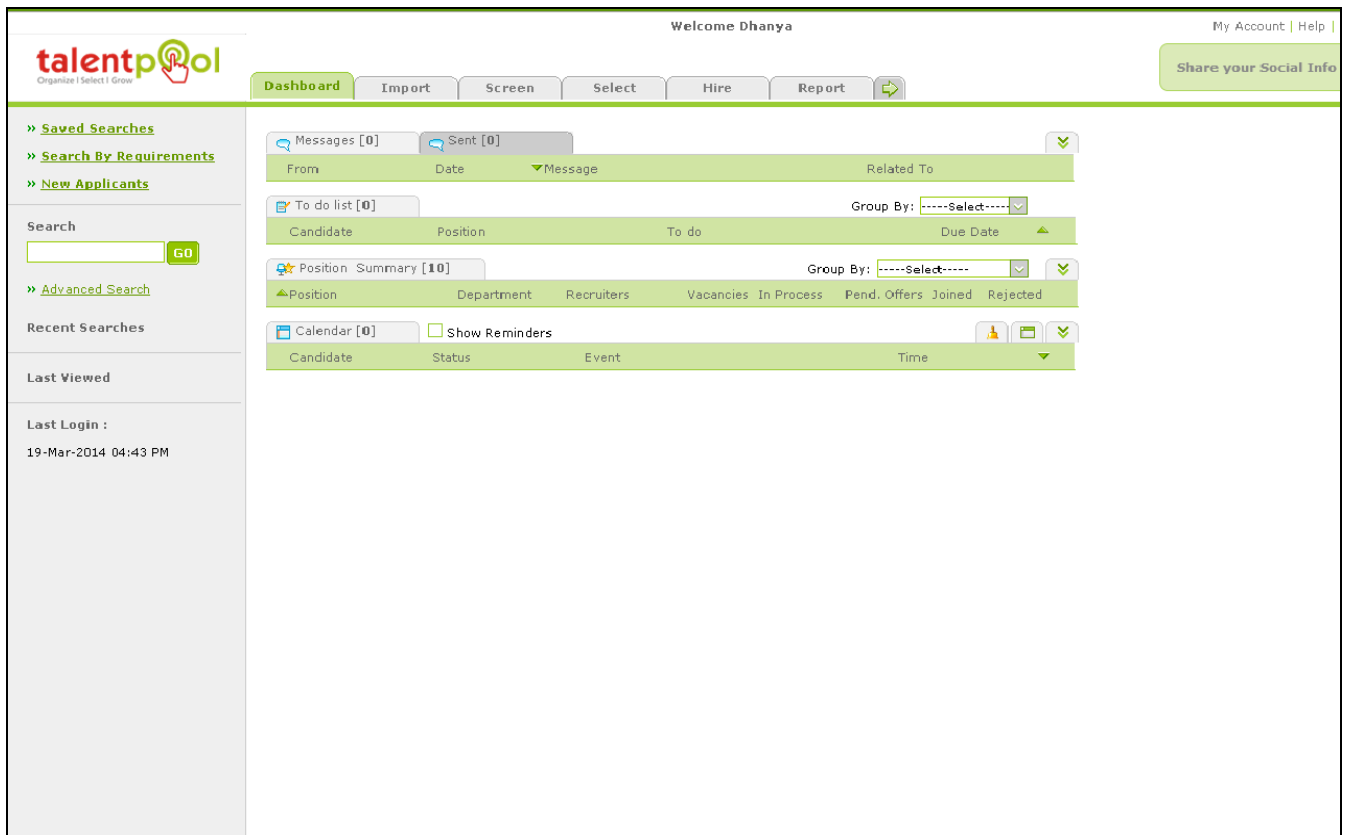

To import user's LinkedIn profile information into Talentpool, follow the steps given below.

1. Click **Share your Social Info**
2. Click **Share LinkedIn Info**

3. Enter LinkedIn credentials
4. Click **Allow Access**
5. Click Save

To import user's Facebook profile information into Talentpool, follow the steps given below.

1. Click **Share Facebook Info**
2. A prompt for permission will appear, click **allow**
3. Click **Save**

Note: The 'Share your Social Info' button pops up on every page until the user shares his/her info. The 'Social Profile' can also be accessed from **My Account->Social Profile**.

How do I publish positions to LinkedIn and Facebook?

To publish open position details to LinkedIn and Facebook, follow the steps given below.

1. Go to **Positions** tab
2. Under **Publish to**, click **Social Media**
3. Double Click on Position to select
4. Select Media- Facebook or LinkedIn or both
5. Select **Group/Company**
6. Select a **Template**
7. Enter a **Title**
8. Enter **Description/content**
9. Click **Submit**

Note: The 'Social Media Job Posting Template' can be used to post jobs to social networks.

How do I view a Candidate's Social profile?

Talentpool stores social profile information of candidates who applied for a particular opening through social media. To view a candidate's social profile, follow the steps given below.

1. Open a candidate profile from any of the tabs
2. Click **Social Profile**
3. Candidate's social profile will be displayed along with graph data of similar companies and colleges.

Troubleshooting

I cannot find version number of Talentpool.

You can view the version number of Talentpool in the Login screen. It is written below the login window.

Which browsers and versions are supported by Talentpool?

Talentpool supports Internet Explorer, Mozilla Firefox and Google Chrome. The versions supported are Mozilla Firefox.20 .0 to 36.0 and I.E. 9.0, 10.0 and 11.0.

I have interviewed a candidate, but I cannot move him to the next selection step.

You can move a candidate to next selection step only if you are a decision maker for the interview. Otherwise you can only enter your feedback. If you are a decision maker, refer *Move a Candidate to the Next Selection Step* on page 30.

I want to customize feedback message. How can I do it?

Feedback messages are set in the selection step. You can edit selection steps of the position created by you. HR Manager can edit selection steps of all positions. To customize feedback messages, follow the steps given below.

1. Click **Positions** tab.
2. Select the position of which you want to change the feedback field and click **View Process**.
3. Click **Edit**.
4. Click the step of which you want to change the feedback field.
5. In the **Feedback Fields** you can do the following.
 - To remove a criterion, click delete icon to its left.
 - To change the sequence, click up/down arrows on the right.
 - To add a new criterion, enter text in the text box field and click **Add**.
6. Click **Save**.

I want to take back-up of data. How should I do it?

Back-up needs to be scheduled on server

Create c:\talentpool_backup folder

Go to control panel - > **Add Scheduled Task**

Screen 1: **Next**

Screen 2: Click browse and select "**backup.bat**" file from C:\Program Files\TalentPool\backup folder

Screen 3: Change the name "**backup**" to "**talentpoolBackupJob**". Select Daily and click next.

Screen 4: Set the time

Screen 5: Enter username and password click next

Screen 6: Click open **advanced properties** check box and click **Finish**

On the properties screen modify path in Run:

"C:\Program Files\TalentPool\backup\backup.bat"

to

"C:\Program Files\TalentPool\backup\backup.bat" c:\talentpool_backup

Click **Finish**.

Go to scheduled tasks window and right click on talentpoolBackupJob and run.

If job runs successfully you will see a folder created in c:\talentpool_backup folder with today's date in "yyyymmdd" format, which contains talentpool.sql file and attachments and documents as 2 folders.

You don't need to keep the backup of every day, instead you can keep weekly backup and keep deleting older backup folder as it might consume a lot of disk space, depending upon the data and resumes in Talentpool

While importing, the resume does not open in the right-hand side pane. Instead, the word file gets opened in a new window. How to open it in the same explorer window?

In order to open the resume in the same explorer window, follow the steps given below.

1. Launch **Windows Explorer**
2. On the **Tools** menu, click **Folder Options**.
3. In the **File Options** dialog box, click **File Types** tab.
4. In **Registered file types**, click **Microsoft Word Document**, and then click **Advanced**.
5. From the **Edit File Type** screen, select **Browse in same window** check box, which toggles whether a Word document is launched outside of Internet Explorer.
6. Click OK
The dialog box closes.

While sending email, the email window does not close when I click Send button.

Send email window is not closed until email is sent.

But while sending email if screen just gets refreshed instead of close; check that port No 25 is opened on server where Talentpool is installed. Also, check your firewall settings and anti-virus settings to allow port no 25.

How to configure Talentpool to send SMS?

1. Purchase credit from SMS service provider.

Before enabling SMS feature in talentpool you need to purchase credit from SMS service provider.

We use sms.globalbulksms.com as service provider.

2. Go to sms.globalbulksms.com and register to get username and password
3. Buy credit from globalbulksms

In order to send SMS you need to add one or more sender and get it approved from globalbulksms

You can add sender once you login to globalbulksms.com Once senderid is approved on globalbulksms.com you need to enable SMS in talentpool.

4. Enable SMS in Talentpool
5. Login as admin and go to Admin->SMS Settings
6. Check SMS enabled
7. Set SMS Service Provider to sms.globalbulksms.com
8. Set SMS Service Provider's URL to

http://sms.globalbulksms.com/sendsms.asp?user=xxx&password=yyy&Sender=\$SENDERID&Text=\$MESSAGE
&PhoneNumber=91\$PHONE&track=1

You need to modify the above URL.

User=xxx

Replace xxx with your username of globalbulksms

Password=yyy

Replace yyy with your password of globalbulksms

9. Submit the settings.

Following Variables will be replaced at run time.

Sender=\$SENDERID

\$SENDERID will be replaced by the cell phone number of the user logged in.

For example: While creating user "recruiter1" I have mentioned his mobile number as 919834232345

If recruiter1 is logged in the talentpool and sends SMS, the \$SENDERID will be dynamically replaced by above mobile number, so user who receives SMS will see above number as from mobile number.

Also above number 919834232345 needs to be registered and approved with globalbulksms.com as sender id.

P.S. Senderid should be a GSM phone number.

I do not want users to access Talentpool with the same User Id from two different systems.

By default Talentpool allows users to access it from two different can definitely be accessed with single user id on two different machines. However if you do not want such a behavior, follow the steps given below:

1. Click **Admin**
2. Click **Application Settings**
3. Check the box to enable single sign-on
4. Click **Submit**

When single-sign on is enabled, if User1 is logged into Talentpool from System1, it will not be possible for User1 to access Talentpool from System2. In case one tries to do that, the system would throw an alert message and User1 would be automatically logged out of System1.

I have created a position but my recruiter is not able to see the position neither in positions tab nor in his To do list.

Recruiter is not able to see the position until he is responsible for at least one step in the selection process of the position. If you want recruiter to be able to see a particular position, go to **Position** tab and edit position selection process. Edit any step and mark the required recruiter responsible for that step.

I am unable to view the history of joined candidates. It is not available in the user interface.

You can go to **Hire** tab and see joined candidates display. You can use filter to see candidates joined within last 30 days, 90 days and All. This can be also viewed in **Monthly Joining Report** which is available in summary, details and chart format in **Report** tab.

I am unable to view a list of rejected candidates.

You can view a list of all the rejected candidates from the dashboard. Follow the steps given below to view rejected candidates from the dashboard:

1. Go to **Dashboard**.
2. Click on any of the values under **Rejected** in the **Positions Summary** section.
3. Search for list of rejected candidates using the filters.

Follow the steps given below to view rejected candidates from the Positions tab:

1. Go to **Positions** tab
2. Click on any **Position**
3. Click **Applicants** on the Position page
4. Search for list of rejected candidates using the filters.

I am unable to add multiple employment details to a Candidate's Employment History.

You can add multiple employment details to a candidate's profile while parsing resume. Follow the steps given below to add multiple employment details:

1. Open a Candidate Profile from any of the tabs
2. Click **Edit**
3. Click **More** under Employment History
4. Drag and drop the company details from the candidate's resume to the employment history field

5. Click **Update**

Note: Tab through all the fields under Employment History to update the fields automatically.

Talentpool software extracts five skills. But I want it to extract more than five skills.

By default Talentpool only extracts 5 Top skills (skills appearing maximum no. of time) from the resume. If you want the program to extract more skills, go to Admin Application Settings and change property **Maximum no of skills extracted in import** to desired number.

A new placement agency does not show up in the source drop-down during import.

It is necessary to upload a new placement agency in the database. Then only it appears in the **Source** drop-down list. An administrator or HR Manager is responsible to add a new placement agency in the database. To add new agency, follow the steps given below.

4. Click **Master lists**.
5. Click **Source Master**. You will see list of existing placement agencies.
6. Click **Add New**.
7. Enter new agency in **Source Category** field and click **Submit**.

The import wizard is picking up the applicant resume from an attachment. I want it to import from the email body.

When you want to import resume embedded in the email body, select **Email body as a resume** field above import window

The resume parser does not pick up education details of applicants.

All educational institutes or degrees in the masters are picked up by the parser. Sometimes, there are different ways in which the same institute or degree is written in resumes. For example, IIT, I.I.T., or Indian Institute of Technology. For this, aliases should be used in the **Master Lists** tab.

The resume parser is not picking up a skill that we want it to.

All skills in the masters are picked up by the parser. Sometimes, there are different ways in which the same skill is written in resumes. For example, SQL server, MySQL server, MS SQL server, or SQL server. For this, aliases should be used in the **Master Lists** tab.

We interviewed a candidate for one position, but now find him fit for another.

You can move a candidate to some other position only if you are marked as a decision maker for that position. To move the candidate to other position, follow the steps given below.

1. Click **Enter Feedback**.
2. Select **Move to other position**.

Candidate does not appear for interview. How can I reschedule an interview?

You are required to enter feedback in the candidate details window. In the feedback form you will get an option for rescheduling the interview. To do so refer *Define Permission to Move Candidate to Other Position*
To define permission to move the candidate to other position, follow the steps given below:

6. Go to **Admin**
7. Click **Manage Role Access**
8. Scroll down to **Selection Process**
9. Select **Move to other Position**
10. Click **Save**

Note: HR managers, Administrators and CXOs are permitted by default to move candidate to other position.

Reschedule an Interview that has Already been Setup *on page 61*.

I just completed an interview, but cannot enter my feedback.

You can enter feedback for the interview conducted only after scheduler has confirmed attendance for the interview. You will see “Enter feedback for the interview” message in your **To do list**.

How do I hide Source details from the Interview panel?

You can hide source details from the interview panels. Follow the steps given below to do this:

1. Go to **Admin**
2. Click **Application Screen configuration**
3. On the Import screen tab select **Confidential**
4. Click **Save**

I want to customize the Duplicate Detection Settings.

Administrator or any user with the rights to change settings can change the Duplicate Detection Settings by following the steps given below:

1. Click **Admin** on the top right corner of the window.

2. Click **Duplicate Detection Settings**. It displays all the fields that are available and can be used for Duplicate Detection Settings.
3. Select the fields (Name, Email id, Mobile number) which you want to activate by checking the boxes given. When checking the Name field it would give two options- **Exact match** and **Approximate match**.
4. Click on the one that you want to apply as a Duplication Detection criteria.

(P.S. - If you choose **Exact Match** the software would detect only when a resume with exact name exists in the system but if you are choosing an **Approximate Match**, the software would detect any resume as duplicate that has the same initials, same last name or same first name.)

I cannot reject or move a candidate while entering feedback.

Only a decision maker has right to reject or move a candidate. The task of decision making is assigned at the time of defining assessment criteria for selection steps. You cannot reject or move a candidate if you are not marked as a decision maker.

How do I create users (Login IDs)?

To create users follow the steps given below:

1. Go to **Admin**
2. Click **Manage Users**
3. Click **Add New**
4. Put in the all the relevant details in the **Add New User** form.
5. Specify the role that the particular user will play by clicking on the corresponding radio button.
6. Click **Save** to add the user.

To enable or disable a user, select the user and click **Enable/ Disable**. To change password of a particular user, select the user and click **Change Password**.

Note: You can also sort on the basis of **Username, User** and **Role**.

How do I manage the access given to each role/user?

Access to the various functions of Talentpool can be managed very easily by following the steps given below:

1. Go to **Admin**.
2. Click **Manage Role Access**.
3. Click any of the five roles.
Some rights are given to each of the users by default but you can change them if you wish to.
3. Select the rights that you want to give to that particular role and it would be automatically updated.
4. As you click **Save** after you made the changes, a window will pop up which would specify the changes that have been made and the user related to it.
5. If you are sure to make the changes click **Ok**, else click **Cancel**

How do I set the default date and time format?

To set the default date format, follow the steps given below:

1. Go to **Admin**.
2. Click **Application Settings**

3. Scroll down to **Default Date Format**
4. Select the Format from the dropdown list
5. Click **Submit**

To set the default time format, follow the steps given below:

1. Go to **Admin**.
2. Click **Application Settings**
3. Scroll down to **Default Time Format**
4. Select the Format from the dropdown list
5. Click **Submit**

I don't want all the users to access all the reports. Is it possible to classify the reports user-wise?

To classify reports user specifically, follow the steps given below:

1. Go to **Admin**.
2. Click **Report Level Settings**.
3. Click on any of the levels, **Level 1**, **Level 2** or **Level 3**.
4. Check the reports that you want to be under the selected level.
5. Click **Save**.

You can create different report levels and assign different reports to each level. For example if you want the Requisitioner to have access only to the reports of Level 1 (which you have already selected by following the given steps), follow the steps given below:

1. Go to **Admin**
2. Click **Manage Role Access**
3. Select **Requisitioner**
4. Check the box adjacent to **Reports** and **Level 1**
5. Click **Save**

The software would require confirmation of the same by showing the user and the changes that you made.

6. Click **Ok**

Now the Requisitioner would have access only to the reports of Level 1. This procedure can be applied for all the users. Reports can be added or deleted from the levels by redefining them. If you select Level1 and Level2 reports for user then he will be able to access all the reports assigned in level1 and level2.

I want to hide some of the candidate details from some users. How can I do it?

To hide candidate interaction history for a specific user, say the Requisitioner, follow the steps given below:

1. Go to **Admin**.
2. Click **Manage Role Access**.
3. Click **Requisitioner**.
4. Select **Do not show Confidential data**.
5. Go to the candidate detail screen.
6. Click on the **Hide** icon and hide that particular interaction.

When the interaction is hidden, the Requisitioner would not be able to access it. This can be done for any user. Likewise the **Files** of a particular candidate can also be hidden for one or more users.

One of the users left our organization. Yet, I cannot delete the user from the system. How do I prevent this person from continuing to use the system?

You can delete only those users who haven't participated in the recruitment process yet. If user performs any single activity in the recruitment process, you cannot delete such user. However, an administrator has a right to deactivate the users.

To deactivate the user, follow the steps given below.

1. Click **Admin** on the top-right side of the window.
2. Click **Manage Users**. It displays all the existing users.
3. Select the user that you want to deactivate.
4. Click **Enable/Disable**.
Selected user's name fades. Now this user cannot access Talentpool.

Note: You can also sort on the basis of **Username**, **User** and **Role**.

There are no mails in my Inbox. What should I do?

Administrator is responsible for configuring Talentpool to download emails from a POP/ IMAP/ Microsoft Exchange Server account. After configuration you will receive mails in your Inbox. To configure Talentpool to download emails from a POP/ IMAP account, follow the steps given below.

1. Click **Admin** on the top-right side of the window.
2. Click **Inbox settings** link on the left side.
3. Select the **Server type**.
4. Enter **Incoming Mail Server** and **Outgoing Mail Server name**
5. Click **Submit**.

To configure Talentpool to download emails from a Microsoft Server Exchange account, follow the steps given below.

1. Click **Admin** on the top-right side of the window.
2. Click **Inbox settings** link on the left side.
3. Select the **Server type- Microsoft Exchange Server**.
4. Enter **Exchange Server Name**
5. Enter **Domain**
6. Click **Submit**.

A message indicating that settings were updated successfully appears.

I want to change the contents of reminder emails.

Administrator can change the contents of reminder emails. To change the contents of reminder emails, follow the steps given below.

1. Click **Master Lists** tab.
2. Click **Template Master** to view existing templates.
3. Click the reminder template that you want to change.
4. Make necessary changes and click **Save**.
Changes are saved.

I want to change the maximum attachment size.

Administrator can change configuration for attachment size. To change the configuration, follow the steps given below.

1. Click **Admin** on the top- right side of the window.
2. Click **Application settings** link on the left side of the window.
3. Make necessary changes in the **Maximum attachment size in MB** field.
4. Click **Submit**.

A message indicating that settings were updated successfully appears.

Note: Talentpool will not be able to amend the server configuration for attachment size.

How do I modify existing templates?

Administrator can modify existing templates. To modify existing templates, follow the steps given below.

1. Click **Master Lists** tab.
2. Click **Template Master** link on the left side of the window to view existing templates.
3. Click the template that you want to modify.
4. Make necessary changes and click **Save**.

Note: Users can modify only those templates which are created by them. You can see the global templates created by other users.

I want to disable Outlook Meeting Requests sent immediately after appointment is set up.

Administrator can disable Outlook Meeting Requests. To do so, follow the steps given below.

1. Click **Admin**
2. Click **Application Settings**.
3. Clear **Send appointment requests in outlook** checkbox.
4. Click **Submit**.

A message indicating that settings were updated successfully appears.

How do I change the frequency at which Talentpool checks for fresh Emails/Polling duration?

Administrator can change the frequency at which Talentpool checks for fresh emails. To do so, follow the steps given below.

1. Click **Admin** on the top right side.
2. Click **Inbox settings** link on the left side to open inbox settings window.
3. Change the **Polling Duration** and click **Submit**.

A message indicating that settings were updated successfully appears.

What happens to the in process resumes when a position is closed?

If a position is closed, all the in-process candidates are automatically marked as “Moved to position closed” instead of “Rejected”.

What is LDAP Settings? How to set up LDAP in Talentpool?

LDAP settings will enable user to login using windows username/password instead of using TalentPool.

1. Go to **Admin**
2. Go to **LDAP settings**
3. Click on **Ldap Enabled**
4. On the next screen it will ask for **Server URL** and **Security principal**

Server URL is the URL of your domain server and should be entered in following format:

ldap://serverip:port

For Example: ldap://10.10.1.12:389

Security Principal:

If domain is talentpool.com then it will be dc=talentpool,dc=com

If domain is talentpool.in then it will be Dc=talentpool,dc=in

5. The next screen will ask for LDAP authentication. You need to enter the windows username and password here.

Note: The username entered here first time will replace username “admin” in talentpool.

And this user will become the administrator.

For example:

If someone is logged in as username=admin and password=xxx in TalentPool, then he sets the LDAP settings and on authentication page he enters username=sachin and password=windows password, then admin will be replaced by Sachin.

Next time he will not be able to login using username=admin and password=xxx in TalentPool but if he wants to login as administrator he will be using username=sachin and password=windows password.

6. After Enabling LDAP, all the users created in Manage user section should have the same username as their windows username and password can be anything.

If LDAP is disabled, then follow the steps given below to change password:

1. Enter **Username**
2. Click **Forgot Password**
3. Enter **Security Answer**
4. Click **Ok**

Note: The application follows a password complexity pattern that is configured by the Talentpool administrator. When the secret question is answered, the password confirmation mailed to the user. In case of many unsuccessful attempts, the system locks the option to change password. The user then needs to contact the system administrator.
